CONTENTS

	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2.1. Effect of irrigation water on wheat crops	3
2.1.1. Grain yield	3
2.1.2. Straw yield	6
2.2. Effect of nitrogen fertilizer on wheat crop yields	11
2.2.1. Grain yield	11
2.2.2. Straw yield	13
2.2.3. Nitrogen utilization efficiency by wheat plant and its effect on protein content	14
2.3. Effect of potassium fertilizer on wheat crop yield	14
2.4. Effect of interactions of irrigation intervals, N and K fertilization on wheat	15
3.MATERIALS AND METHODS	17
3.1.The experimental design	17
3.1.1. Irrigation regimes (irrigation intervals)	17
3.1.2. Nitrogen sources and levels	17
3.1.3. Potassium levels	18
3.2. Soil physical and chemical analysis	18
3.3. Wheat water relation parameters	20
3.3.1. Actual water consumptive use	20
3.3.2. Seasonal water consumptive use	20
3.3.3. Monthly water consumptive use	22
3.3.4. Soil moisture extraction pattern within the root zone of 60 cm (S.M.E.P.)	22
3.4. Water use efficiency (W.U.E)	22
3.5. Potential evapotranspiration estimated by some ET formulae (ETcrop)	22
3.5.1. Penman method	23
3.5.2. Penman Monteith method	24
3.5.3. Doorenbos and Pruitt method	25
3.6. Comparison with the actual ET	25
3.7. Plant analysis	26

4. RESULTS AND DISCUSSIONS 27
4.1. Wheat water relation parameters 27
4.1.1. Actual water consumptive use 27
4.1.1.1. Seasonal water consumptive use 27
4.1.1.2. Monthly water consumptive use 31
4.1.1.3. Soil moisture extraction pattern within the surface root zone 33
4.1.1.4. Water use efficiency (W.U.E) 38
4.1.1.5. Wheat evapotranspiration estimated by some ET formulae (ETcrop) 42
4.1.1.6. Comparison between the calculated ETcrop and the actual ET 42
4.2. Effect of water regime and mineral fertilizers on wheat yield and its chemical composition 45
4.2.1. Grain yield 45
4.2.2. Straw yield 51
4.2.3. Number of spike/m^2 57
4.3. Wheat yield components 62
4.3.1. Nitrogen content in wheat grains 62
4.3.2. Phosphorus content in wheat grains 67
4.3.3. Potassium content in wheat grains 72
4.3.4. Nitrogen content in wheat straw 78
4.3.5. Phosphorus content in wheat straw 84
4.3.6. Potassium content in wheat straw 89
5. SUMMARY AND CONCLUSIONS 95
6. REFERENCES 99
