«Big projects of electronics, Medicine, Clothes, Major industries at Suez Canal axis» says the Head of the Suez Canal Development Board

Dr. Ahmed Darwish, the head of Suez Canal development board asserts that the idea of Suez Canal axis project was initiated in 1976, but the project was put into practice at the era of president El-Sisi a year ago. The project was divided into stages. The first stage is on the banks of the canal from Port Said to Ein-el- Sokhna.

This stage is divided into four sub-stages: the first one is east port-said; the second one is in «Kantra- Garb», the third one is east Ismailia and the forth one is Ein-el- Sokhna and building six ports in Sinai. Darwish says that the first stage aims at building an investment attracting industrial territory, the second stage focuses on manufacturing cars, electronics, medicine and clothes and providing the youth of job opportunities, especially in electronics, the next stage concentrates on the major industries in Ein-el- Sokhna.
