The 10th International Internet E-Learning Conference & Exhibition

(ICT-Learn 2016)

"ICT applications in learning towards Information society".

12-14December, 2016
Helton Ramses Hotel
Cairo, Egypt

CALL FOR PARTICIPATION

The **mission of the conference** is to provide an effective and established international forum for discussion and dissemination of recent advances and innovations in E-Learning at the university level and schools. Its objective is to allow leading-edge educators and developers in a wide variety of areas concerned with technology-enabled teaching and learning to present their results. The**theme of the conference** this year will be: **"Information and communication Technology applications in learning towards Information society".**

Important Dates:

- **Abstract deadline first of September, 2016**
- Paper submission deadline**31of October, 2016**
- Versions incorporating reviewers' modifications: 15 **of November, 2016**

Scope of the conference:

The primary focus of this conference is on new and innovative applications of technology-enabled education in universities and schools around the world. We solicit the submission of papers that address novel and challenging ideas and/or report on real applications with concrete results. In particular, this year we are looking for submissions thatare seeking to learn best practices, to share case studies and to identify emerging technologies (software, hardware and embedded systems) that can make their 'e-learning' systems more powerful.**Suggested topics include, but are not limited to, the following areas:**

Bridging the Divide- Digital Learning Initiatives Supporting People in Need
Universities and STEM education for high school students (Science, ICT, Engineering, Math)
Technology Enabled Education – Around the World
Tools for the Digital Learning Experience
Reflections- the Next Generation of Learning
Providing Quality Education at Scale
Children University
Lifelong learning
