

CONTENTS

INTRODUCTION.....	1
REVIEW OF LITERATURE	3
I. Effect of planting date on growth characers of fababean	3
II. Effect of planting date on yield and its components	4
III. Effect of biophosphorus fertilization on faba bean growth characters	8
IV. Effect of biophosphorus fertilization on faba bean yield and its components.....	9
V. Effect of mineral phosphorus fertilization on faba ben growth characters	11
VI. Effect of mineral phosphorus fertilization on faba bean seed yield and its components	12
VII. Susceptibility and preferability of faba bean seeds to the storage insects.....	14
MATERIALS AND METHODS	23
RESULTS AND DISCUSSION	33
I. Growth characteristics	33
1. Seed germination percentage	33
2. Plant height.....	36
3. Number of branches/plant at 100 days from planting date	39
4. Fresh weight (g/plant)	42
II. Yield component characters	45
1. Number of branches/plant at harvest	45
2. Number of pods/plant	48

3.	Pods weight (g/plant	50
4.	Seed yield (g/plant)	52
5.	100-seed weight (g)	55
6.	Seed yield (kg/fed)	57
7.	Straw yield (kg/fed)	60
8.	Biological yield (kg/fed)	63
9.	Harvest index	65
III.	Seed quality	68
1.	Seed coat percentage	68
2.	Seed cotyledons percentage of faba bean	70
3.	Phosphorus percentage in faba bean seeds	73
IV.	Infestation of <i>Callosobruchus maculatus</i> (F.)	75
1.	Effect of planting dates	75
2.	Effect of fertilization	75
3.	The interaction between planting dates and fertilizers type	79
