| **1- INTRODUCTION** | **1** |
| **2- REVIEW OF LITERATURE.** | **3** |
| 2-1 Characteristics and nature of calcareous soils | **3** |
| 2.1.1. Physical properties | **5** |
| 2.1.2. Chemical properties | **7** |
| 2.2. Status of iron in calcareous soils | **8** |
| 2.2.1. Total iron in soils | **9** |
| 2.2.2 Solubility of iron in soils | **10** |
| 2.2.3. Availability of iron in soils | **11** |
| 2.3. Indigenous soil factors affecting iron availability | **13** |
| 2.3.1. Bicarbonate and calcium carbonate | **13** |
| 2.3.2. Soil pH | **17** |
| 2.3.3. Redox potentiel | **18** |
| 2.3.4. Soil moisture | **20** |
| 2.3.5. Interaction with other nutrients in soil | **22** |
| 2.4. Iron in plants | **28** |
| 2.4.1. Total iron in plant | **28** |
| 2.4.2. Active iron in plant | **29** |
| 2.4.3. Iron deficiency in plant | **31** |
| 2.4.4. Correction of iron chlorosis in plant | **33** |
| 2.4.5. Causative factors of iron chlorosis | **37** |
| 2.5. Strategies of plants for acquisition of iron | **39** |
| 2.6. Soil amendments in relation to iron availability and pH | **44** |
| 2.6.1. Sulfur | **44** |
| 2.6.2. Acid Fertilizers | **45** |
| 2.6.3. Organic amendments | **47** |
| **3. MATERIALS AND METHODS** | **49** |
| 3.1. Materials | **49** |
| 3.1.1. Soil samples | **49** |

3.1.2. Soil amendments **49**
3.1.3. Nutrient solution composition **55**
3.2. Experiment one: **55**
3.3. Experiment two: **58**
3.4. Experiment three: **60**
3.5. Methods of analysis **60**
3.5.1 Soil analysis **60**
3.5.2. Plant analysis **62**
3.6. Statistical analyses **62**
**4. RESULTS AND DISCUSSION** **63**
4.1. Experiment one **63**
4.1.1. Plant parameters of barley plants as affected by indigenous soil factors **63**
4.1.1.1. Dry matter yield **64**
4.1.1.2. Active and total iron concentration in barley plants **74**
4.1.1.3. Fe-uptake **74**
4.1.1.4. Stepwise regression analysis **74**
4.1.2.Plant parameters of soybean plants **77**
4.1.2.1. Dry matter yield **77**
4.1.2.2. Active and total iron concentration in soybean plants **77**
4.1.2.3. Fe-uptake **85**
4.1.2.4. Stepwise regression analysis **85**
4.1.3. Stepwise regression analysis of DTPA-extractable Fe and selected soil parameters **88**
4.2. Experiment two: **91**
4.2.1. Plant parameters: Straw, pods and seeds yield of soybean **91**
4.2.2. Nutrient concentrations **99**

4.2.3. Macro and micronutrients concentrations in soybean seeds: **121**

4.2.4. Effect of $FeSO_4$ and acid-type fertilizer on DTPA-extractable Fe and soil pH on low or high calcareous soils **139**

4.3. Soil iron availability and pH as affected by soil amendments **147**

4.3.1. Effect of different amendments on pH of the studied soils **147**

4.3.2. Effect of different amendments on DTPA-extractable Fe of the studied soils **152**

**5. SUMMARY AND CONCLUSION** **160**

**6. REFERNCES** **164**

**- ARABIC SUMMARY**
