</table>
Leaf and fruit rind magnesium content (Mg %)--- 130
Leaf and fruit rind iron content (Fe ppm)---------- 134
Leaf and fruit rind manganese content (Mn ppm)--- 137
Leaf and fruit rind zinc content (Zn ppm)--------- 140
Leaf and fruit rind copper content (Cu ppm)------- 143

IV.II- Second Experiment: Effect of (GA₃; P; K) foliar spray in combination with application date and geographical direction on Tanarif sweet orange cultivar ---------------------------- 146
IV.II.1- Fruit quality-------------------------------- 146
   IV.II.1.A- Fruit physical properties---------------- 146
   Average fruit weight (g) and size (cm³)----------- 147
   Fruit dimensions (polar & equatorial diameters)--- 149
   Fruit rind thickness (mm) and weight (g)-------- 154
   Fruit juice weight (g) and volume (cm³)-------- 158
   IV.II.1.B- Fruit chemical properties-------------- 162
   Fruit juice total soluble solids percentage (TSS %) 162
   Fruit juice total acidity percentage------------- 164
   Fruit juice TSS/acid ratio---------------------- 168
   Fruit juice V.C. "ascorbic acid" content-------- 170

IV.II.2- Creasing incidence in Tanarif fruits as related to different folia spray treatments, geographical direction, fruit status and measuring dates------ 174

IV.II.3- Nutritional status (leaf and fruit rind mineral composition)----------------------------- 177
Leaf and fruit rind nitrogen content (N %)-------- 179
Leaf and fruit rind phosphorus content (P %)------ 183
Leaf and fruit rind potassium content (K %)------- 187
Leaf and fruit rind calcium content (Ca %)-------- 190
Leaf and fruit rind magnesium content (Mg %)----- 195
