الملخص العربي
سرطان الغدة الدرقية: التشخيص والتقييم والعلاج

يعتبر سرطان الغدة الدرقية من أكثر أورام الغدد الصماء شيوعًا إذ يمثل حوالي 90% من مجموع أورام الغدد الصماء الخبيثة وتزيد نسبة حدوثه في الإناث عن الذكور بمعدل 3:1.

لا يزال التشخيص الإكلينيكي والفحوصات العملية والموجات فوق الصوتية والمسح الذري وسائل لا تقدم التقييم الشامل ومن ثم العلاج الجذري لسرطان الغدة الدرقية.

وهو الهدف من الفحوصات المختلفة على الغدة الدرقية التوقع المبكر للسرطان من بين كم هائل من أورام وأمراض الغدة الدرقية الحميدة.

وأجري هذا البحث في إطار تشخيص وتقييم وعلاج سرطان الغدة الدرقية.
