THE RATIONALE FOR THE CONFERENCE

With the recognition of the essential role of scientific research in the development of the community, the Postgraduate Studies and Research Sector at Tanta University will hold the 3rd Conference for **Enhancing Scientific Research** with the goal to present and discuss the competitive research projects that were funded 2 years ago or those that have been submitted for funding this year. The conference is a great opportunity to strengthen the scientific collaboration between junior and senior researchers from various disciplines, and to publish the findings and the hypothesis of these seminal studies in peer-reviewed journals.

CONFERENCE OBJECTIVES

- Inform researchers at Tanta University and related sectors about the research scientific activities at the university and the important outputs of the research projects funded by the university, as well as resultant translational significance.
- Support the interdisciplinary research, where researchers from different disciplines participate to achieve the national academic and community needs.
- Help the university researchers in developing outstanding research programs that meet the University vision, mission, priorities and strategic plan.
- Improve people capacity building by fostering the scientific interaction between junior and senior researchers throughout the active contribution into the funded projects.
- Upgrade the level of scientific research at the university by applying the quality assurance standards on research activities and encouraging researches with research idea characterized by innovation, creativity and practical applicability.
