CONTENTS

Summary

1. Introduction	1
1.1. Synthetic surface active agents	1
2. Classification of surface active agents	2
2.1. Nonionic surfactants	2
2.1.1. Carboxylic acid ethoxylated surfactant	3
2.1.2. Fatty alcohols ethoxylated surfactant	6
2.1.3. Mercaptan ethoxylated surfactant	7
2.1.4. Amine ethoxylated surfactant	8
2.1.5. Amide ethoxylated surfactant	10
2.1.6. Condensation products of ethylene and propylene oxides	11
2.1.7. Alkylol amides	12
2.1.8. Fatty amine oxide	13
2.2. Anionic surface active agents	15
2.2.1. Surfactants from fatty alcohol sulfates	16
2.2.2. Surfactants from fatty acid and ester	17
2.2.3. Surfactants bearing 1,3-dioxalane ring	17
2.2.4. Surfactants bearing imidazoline ring	19
2.2.5. Surfactants bearing pyrrolidone nucleus	20
2.2.6. Surfactants bearing pyrane ring	23

2.2.7. Surfactants bearing thiophene ring	24
2.2.8. Surfactants bearing pyrrole ring	25
2.3. Cationic surfactants	25
2.4. Amphoteric surfactants	26
3. Surface properties of nonionic surfactants	27
3.1 Cloud point	28
3.2. Surface and interfacial tensions	28
3.3. Foaming power	29
3.4. Emulsification power	30
4. Field of Applications	32
Results and Discussion	35
Experimental	59
Figures	
References	80
