Chapter 1. Introduction	1
1-1. Synthesis of Nanostructured Materials.....	1
1-2. Properties of Nanostructured Materials	3
1-3. Applications of Nanostructured Materials.....	5
1-4. Titanium Oxide.....	5
1-4.1. Crystal structure	5
1-4.2. Synthesis methods of nanoparticles.....	8
1-4.3. Applications	9
1-5. Zinc Oxide	10
1-5.1. Crystal structure.....	10
1-5.2. Synthesis methods of nanoparticles	10
1-5.3. Applications	10
1-6. Nickel Oxide.....	11
1-6.1. Crystal structure	11
1-6.2. Synthesis methods of nanoparticles	11
1-6.3. Applications	11
1-7. Silica Gel.....	12
1-7.1. Crystal structure	12
1-7.2. Synthesis methods	13
1-7.3. Applications	13
1-8. Silver	14
1-8.1. Crystal structure.....	14
1-8.2. Synthesis methods	14
1-8.3. Applications	15
1-9. Biological Activity	15
1-10. Literature Survey	18

	Page
1-11. Aim of the Work.....	43
Chapter 2. Theoretical Review and Calculation Methods	44
2-A. Electrical Conductivity.....	44
2-A.1. Conduction mechanisms	44
2-A.1.a Band models	44
2-A.1.b Hopping mechanism.....	46
2-A.2. Dc- conductivity	47
2-A.3. Ac- conductivity	48
2-A.4. Dielectric constant and dielectric loss	49
2-A.5. Dipolar dispersion	51
2-A.6. Complex impedance method	52
2-B. Nitrogen Adsorption Measurements.....	56
2-B.1. Adsorption of vapours by solids	56
2-B.2. Types of adsorption isotherms	56
2-B.3. Classification of pore size	59
2-B.4. Estimation of the specific surface area	59
2-C. X-ray Diffraction Analysis (XRD).....	61
2-D. (I-V) Characteristics of Solar Cells.....	62
Chapter 3. Experimental	63
3-1. Materials	63
3-2. Material Preparations	64
3-2.i. Preparation of TiO ₂ by conventional method	64
3-2.ii. Synthesis of TiO ₂ using micelle-template method	64
3-2.iii. Preparation of ZnO by conventional method	64
3-2.iv. Synthesis of ZnO using micelle-template method	65

	Page
3-2.v. Preparation of NiO by conventional method	65
3-2.vi. Synthesis of NiO using micelle-template method	65
3-2.vii. Preparation of silica gel	65
3-2.viii. Preparation of metallic silver.....	66
3-2.x. Preparation of metallic silver by conventional method	66
3-2.xi- Preparation of metallic silver by template method	67
3-3. Physicochemical Characterization of Materials	67
3-3.a. X-ray diffraction analysis (XRD)	67
3-3.b. Fourier transform infrared spectra (FT-IR)	67
3-3.c. Differential thermal analysis -Thermogravimetry (DTA-TG)	68
3-3.d. Scanning electron microscope (SEM)	68
3-3.f. Transmission electron microscope (TEM)	68
3-3.g. Surface acidity measurements	68
3-3.h. Nitrogen adsorption measurements	69
3-3.i. Electrical properties	70
3-3.k. Catalytic activity measurements.....	70
3-3.l. Adsorption of dye on silica gel.....	71
3-3.m. Antibacterial and antifungal activity of the synthesized samples.....	71
3-3.n. Synthesis of photoelectrochemical solar cell	73
3-3.o. Characteristics of solar cell under illumination	73
Chapter 4. Results and Discussion	74
PART (A)	
4-A. Titanium Dioxide Results	75

	Page
4-D.2. Scanning electron microscopy (SEM)	213
4-D.3. Transmission electron microscopy (TEM) ...	213
4-D.4. FT-IR study of silica samples	217
4-D.5. Surface properties	222
4-D.6. Acidic properties	224
4-D.7. Biological activity.....	229
4-D.8. Adsorption of silica samples	232
4-D.8.a. Adsorption behaviour.....	232
4-D.8.b. Adsorption Kinetics.....	235
PART (E)	
4-E. Silver Results	237
4-E.1. XRD results	237
4-E.2. Scanning electron microscopy (SEM)	240
4-E.3. Transmission electron microscopy (TEM) ...	240
4-E.5. Surface properties	243
4-E.6. Biological activity.....	245
 Summary and Conclusion	 249
References	255
Arabic Summary
