

## List of figures

	Page
Fig. (1):Geographic distribution of chronic HBV infection	3
Fig. (2): Hepatitis B virus	5
Fig. (3):Months after exposure	6
Fig. (4): Genomes of HBV and Woodchuck Hepatitis Virus.	7
Fig. (5): The Three Forms of Hepatitis B Surface Antigen.	8
Fig. (6): cutaway view of complete viral particle	9
Fig. (7): Pathogenesis of the Immune Response	12
Fig.(8): viral assembly including lipid/HBsAg envelope	16
Fig. (9): Genotype of hepatitis (B)	24
Fig. (10): The RNA stem–loop structure	30
Fig. (11): The different steps in PCR	46
Fig. (12): The exponential amplification of the gene in PCR	47
Fig. (13): Verification of the PCR product on gel.	48
Fig. (14): Specific detection target specific probe	55
Fig. (15): SYBR Green I binds to the minor groove of the DNA	56
Fig. (16): Emitted light	57
Fig. (17): Molecules bind to the newly DNA	57
Fig. (18): LightCycler Hybridisation Probes	60
Fig. (19): Oligo 1fluorescein &(LC Red 640)	61
Fig. (20):Hybridize the DNA fragment	62
Fig. (21):The emission of the light	62
Fig. (22): Molecular Beacons	63
Fig. (23): Element of a scorpions primer	64
Fig. (24): The scorpions reaction	65
Fig. (25): The stem-loop tail separation	66
Fig. (26) : The comparison of normal and high AST	96

with (HBeAg) and (HBe-Ab)	
Fig. (27) :The comparison of normal and high ALT with HBe-Ag and HBe-Ab	97
Fig (28) : The comparison of HBV-DNA by PCR with HBcIgG, HBeAb and HBeAg	98
Fig. (29): Genotype D	102
Fig. (30): Genotype D	102
Fig. (31): Genotype D	103
Fig. (32): Genotype D	103
Fig. (33):Genotype D, E.	104

## **List of Tables**

	Page
Table (1) :The four stages of hepatitis B infection	18
Table (2) : Quantitative and qualitative HBV-DNA by real time PCR	84
Table (3): The Correlation between hepatitis Be antigen with Alanine Transaminase and Aspartate transaminase	88
Table (4): The Correlation between hepatitis Be antigen with Hepatitis Be antibody and hepatitis B surface antigen	89
Table (5):The Correlation between hepatitis Be antibody with Alanine Transaminase and Aspartate transaminase	90
Table(6): The Correlation between HBV-DNA PCR with Alanine Transaminase and Aspartate transaminase	91
Table (7):The Correlation between HBV-DNA PCR with Hepatitis Be antigen (HBe-Ag) and hepatitis Be antibody (HBe-Ab)	92
Table (8): The Correlation between HBV-DNA PCR with Hepatitis B surface antigen and hepatitis B core antibody	93
Table (9): The comparison of normal and high Alanine Transaminase with hepatitis B surface antigen and hepatitis B core antibody	94
Table (10):The comparison of normal and high Aspartate transaminase with hepatitis B surface antigen and hepatitis B core antibody	95
table (11): The comparison of normal and high Aspartate transaminase with hepatitis Be antigen and hepatitis Be antibody	96
Table (12): The comparison of normal and high Alanine Transaminase with hepatitis Be antigen and hepatitis Be antibody	97
The table (14) : The genotyping of hepatitis (B) virus for 25 patients	101
