

CONTENTS

	Page
1. INTRODUCTION	1
2. LITERATURE REVIEW	4
2.1. Variability in flax	4
2.2. Correlation studies	17
2.3. Path coefficient analysis of yield and yield components ...	21
2.4. Stepwise multiple regression analysis in flax and other self pollinated crops.	23
2.5. Factor analysis in flax and other self pollinated crops. ...	26
3. MATERIALS AND METHODS	31
4. RESULTS AND DISCUSSION	44
4.1. Mean performance for total weight/ plant and its related characters	44
4.2. Mean performance for components of straw yield/ plant	50
4.3. Mean performance for components of seed yield/ plant ...	54
4.4. Combined analysis over seasons for total weight/ plant and other eleven variables	58
4.5. Variability measurements	61
4.6. Phenotypic and genotypic correlation coefficient	64
4.7. Environmental correlation coefficients.	69
4.8. Path coefficient analysis of total weight/ plant and its Components	73
4.9. Path coefficient analysis of straw yield/ plant and its components	79
4.10 Path coefficient analysis of seed yield/ plant and its Components	85
4.11 The stepwise regression analysis for total weight/ plant and Its components characters	90
4.12 Factor analysis for eleven variables affecting total weight/ plant	94
