MATERIALS AND METHODS	20
RESULTS AND DISCUSSION	26
A. GROWTH CHARACTERS	26
1. Plant height at 60 days from planting.....	26
2. Plant height at harvest	28
3. Number of branches per plant at 60 days from planting	30
4. Number of branches per plant at harvest.....	32
5. Dry weight of branches per plant at 60 days from planting.....	35
6. Number of leaves per plant at 60 days from planting.....	37
7. Dry weight of leaves per plant at 60 days from planting.....	40
8. Number of pods per plant at 60 days from planting	42
9. Dry weight of pods per plant at 60 days from planting.....	45
10. Root length at 60 days from planting.....	47
11. Dry weight of roots per plant at 60 days from planting.....	50
B. YIELD COMPONENTS.....	53
1. Number of pods per plant at harvest.....	53
2. Seed yield per plant.....	56
3. Weight of 100 seeds.....	58
C. SEED YIELD PER FEDDAN.....	60
D. DRY WEIGHT OF WEEDS	65
1. Dry weight of weeds (g/m ²) after three weeks of planting.....	65
2. Dry weight of weeds (g/m ²) after five weeks of planting (before the second hoeing)	67
3. Dry weight of weeds (g/m ²) at harvest.....	70
E. SOIL CHARACTERS.....	73
1. Soil bulk density before planting	73
2. Soil bulk density at harvest.....	75
3. Soil porosity percentage before planting	80
4. Soil porosity percentage at harvest.....	82
5. Soil salinity before planting.....	86
ECONOMIC EVALUATION.....	90
1. Effect of seedbed preparation practices and hand hoeing treatments on the variable and total costs of soybean production	90
2. Value of soybean seed yield as affected by seedbed preparation and hoeing treatments	92
3. Net farm return of soybean production and net return per one invested L.E.	94
