INTRODUCTION.....	1
REVIEW OF LITERATURE	2
I- Effect of irrigation regime	2
II- Effect of nitrogen fertilizer	9
III- Effect of planting density	18
MATERIALS AND METHODS.....	23
RESULTS AND DISCUSSION	29
I. Effect of irrigation regime, nitrogen fertilizer level, planting density and their interactions on growth characters of the plant crop sugar cane.....	29
1. Number of plants/m	29
2. Stalk height	34
3. Stalk diameter	39
4. Elongation rate of cane stalks (ER).....	44
5. Total soluble solids (TSS%)	49
II. Effect of irrigation regime, nitrogen fertilizer level, planting density and their interactions on cane quality and chemical attributes of the plant crop sugar cane.....	53
1. Brix percentage	53
2. Sucrose percentage	55
3. Purity percentage	57
4. Reducing sugar percentage (RS%)	60
5. Sugar recovery percentage (SR%).....	62
6. Nitrogen percentage in cane stalk.....	64
7. Fiber percentage	67
III. Effect of irrigation regime, nitrogen fertilizer level, planting density and their interactions on yield and yield components of the plant crop sugar cane	69
1. Number of millable cane	69
2. Cane yield.....	71
3. Sugar yield.....	75
IV. Water use efficiency.....	78
SUMMARY.....	84
LITERATURE CITED	93
ARABIC SUMMARY
