ACKNOWLEDGMENT.....	I
INTRODUCTION.....	1
REVIEW OF LITERATURE	4
I. Effect of maize genotypes	4
II. Importance and advantage of organic manure.....	11
III. Effect of mineral and organic nitrogen fertilizer rates on maize	14
IV. Effect of the interaction between genotypes and N fertilizer rates	34
MATERIALS AND METHODS	39
RESULTS AND DISCUSSION.....	48
1- <i>Effect of genotypes, N fertilizer rates and their interactions on growth</i> <i>characters of maize</i>	48
1.1- Tasseling date.....	48
1.2- Silking date	51
1.3- plant height	53
1.4- Stem diameter	56
1.5- Number of green leaves plant ⁻¹	59
1.6- Leaf area of topmost ear	63
1.7- Leaf area index.....	65
1.8- Number of ears plant ⁻¹	68
2- <i>Effect of genotypes, N fertilizer rates and their interaction on yield and yield</i> <i>components of maize</i>	72
2.1- Ear length	72
2.2- Ear diameter	75
2.3- Number of rows ear ⁻¹	78
2.4- Number of grains row ⁻¹	81
2.5- Ear weight	84
2.6- Grains weight of ear.....	87
2.7- 100-grain weight.....	90
2.8- Shelling percentage.....	93
2.9- Grain yield plant ⁻¹	96
2.10- Grain yield feddan ⁻¹	99
2.11- Stover yield feddan ⁻¹	103
2.12- Biological yield feddan ⁻¹	106
2.13- Harvest index.....	109
3- <i>Effect of genotypes, N fertilizer rates and their interaction on chemical</i> <i>composition in maize grain</i>	112
3.1- Nitrogen content	112
3.2- Protein percentage	115
3.3- Protein yield feddan ⁻¹	118
3.4- Nitrogen uptake	121
3.5- Nitrogen use efficiency	124
3.6- Apparent nitrogen recovery.....	128
