| INTRODUCTION .....                              | 1    |
| REVIEW OF LITERATURE .....                      | 3    |
| A. Varietal differences .....                   | 3    |
| B. Environmental effects .....                  | 11   |
| C. Anatomical studies .....                     | 17   |
| MATERIALS AND METHODS .....                     | 23   |
| RESULTS AND DISCUSSION .....                    | 33   |
| I. STRAW YIELD AND ITS RELATED CHARACTERS ..... | 33   |
| 1. Total length .....                           | 33   |
| 2. Technical stem length .....                  | 37   |
| 3. Main stem diameter .....                     | 41   |
| 4. Straw yield per plant .....                  | 45   |
| 5. Straw yield per faddan .....                 | 49   |
| 6. Fiber yield per faddan .....                 | 54   |
| II. SEED YIELD AND ITS RELATED CHARACTERS ..... | 59   |
| 1. Number of capsules per plant .....           | 59   |
| 2. Seed yield per plant .....                   | 63   |
| 3. Seed index .....                             | 67   |
| 4. Seed yield per faddan .....                  | 71   |
| 5. Oil yield per faddan .....                   | 75   |
| III. TECHNOLOGICAL CHARACTERS .....             | 79   |
| 1. Long fiber percentage .....                  | 79   |
| 2. Fiber length .....                           | 83   |
| 3. Fiber strength .....                         | 87   |
| 4. Fiber fineness .....                         | 92   |
| 5. Oil percentage .....                         | 97   |
| 6. Iodine value .....                           | 101  |
| IV. SUMMARY OF THE INTERACTION .....            | 104  |
| V. ANATOMICAL INVESTIGATION .....               | 107  |
| SUMMARY .....                                   | 119  |
| LITERATURE CITED .....                          | 126  |
| ARABIC SUMMARY .....                            |      |

## ACKNOWLEDGEMENT

The writer wishes to express his appreciation and gratitude to Dr. Salah El-Din Shafshak and Dr. Abd-El-Hamid S. El-Debaby, Professors at the Agronomy Department, Faculty of Agriculture at Moshtohor, Zagazig University for their valuable advice, inspire help throughout this investigation and during the preparation of the manuscript.

Thanks are also due to Dr. M. El-Farouk, Professor of Agronomy and Director of Fiber Crops. Section, Agric. Res. Center for suggesting the problem, supervision and continuous help through the experimental work and the preparation of this manuscript.

Thanks are also due to Professor D.G.H. El Shimy and the staff members of Fiber Crops Res.Section, Agric. Res. Center, for their valuable advise and continuous help during this work.
