1. INTRODUCTION	1
2. REVIEW OF LITERATURE	4
2.1. Gene action and heritability.....	4
2.2. Phenotypic and genotypic coefficients of variation	12
2.3. Phenotypic and genotypic correlation coefficients	15
2.4. Basis for selection indices	21
2.5. The efficiency of different selection procedures.....	23
2.6. Variability in oil content and associated with some characters.....	30
3. MATERIALS AND METHODS	32
4. RESULTS AND DISCUSSION	60
4.1. Type of Gene Action	60
4.1.1. Generation means	60
4.1.2. Scaling test, F_2 -deviation and BC-deviation	62
4.1.3. Gene action effects.....	64
4.1.4. Potence ratio, and heritability estimates	67
4.1.5. Predicted genetic advance	70
4.2. Selection Procedures	71
4.2.1. Selection index and phenotypic trait selection.....	71
4.2.1.1. Variance components.....	71
4.2.1.2. Means, ranges, phenotypic and genotypic coefficients of variation and heritability estimates.....	75
4.2.1.3. Phenotypic and genotypic correlation	95
4.2.1.4. The phenotypic weights (b's).....	101

4.2.1.5.	Predicted and realized genetic advances of lint yield	105
4.2.1.6.	Correlated response to selection for lint yield and unselected traits.....	112
4.2.2.	Recurrent selection.....	117
4.2.2.1.	Mean performance and mean square estimates.....	117
4.2.2.2.	Genetic variability and predicted genetic advance.....	120
4.2.2.3.	Evaluation of recurrent selection hybrids.....	122
4.2.2.4.	Phenotypic and genotypic correlation .	130
4.2.3.	Comparative efficiency of the different selection procedures	134
4.2.4.	Effect of phenotypic selection for seed index on seed characters.....	136
4.2.4.1.	Mean performance	140
4.2.4.2.	Genetic variability for seed characters .	140
4.2.4.3.	Heritability estimates.....	141
4.2.4.4.	Phenotypic correlations and actual advances	141
5.	SUMMARY	143
6.	LITERATURE CITED	152
7.	APPENDIX.....	167
ARABIC SUMMARY
