-INTRODUCTION	1
-REVIEW OF LITERATURE	3
<i>A-Effect of seedbed preparation.....</i>	3
<i>B-Effect of biological fertilizers.....</i>	16
-MATERIALS AND METHODS	25
-RESULTS AND DISCUSSION.....	34
I-Chemical and biological properties of soil.....	34
<i>A-Effect of seedbed preparation.....</i>	34
1-pH.....	34
2-E.C.	35
3-Organic matter.....	36
4-Total nitrogen.....	37
5-Total phosphorus.....	37
6-Available nitrogen.....	38
7-Available phosphorus.....	39
8-Bacterial counts.....	41
<i>B-Effect of biological fertilizers.....</i>	41
1-pH	41
2-E.C.	42
3-Organic matter.....	42
4-Total nitrogen.....	43
5-Total phosphorus.....	44
6-Available nitrogen.....	44
7-Available phosphorus.....	46

8-Bacterial counts	46
II-Emergence percentage and total weed	49
<i>A-Effect of seedbed preparation</i>	49
1-Emergence percentage.....	49
2-Fresh weight of weeds.....	49
3-Dry weight of weeds	50
<i>B-Effect of biological fertilizers</i>	52
1-Emergence percentage.....	52
2-Fresh weight of weeds.....	53
3-Dry weight of weeds.....	53
<i>C-Interaction effect</i>	55
III-Growth Characters	57
<i>A-Effect of seedbed preparation</i>	57
1-Plant height.....	57
2-Ear height.....	58
3-Number of leaves / plant.....	59
4-Stem diameter.....	60
5-Leaf area of topmost ear	61
6-Fresh weight of maize plant organs	63
6-a-Leaves	63
6-b-Stem + sheaths + tassel.....	64
6-c-Ear	65
7-Dry weight of maize plant organs.....	67
7-a- Leaves	67
7-b-Stem + sheaths + tassel.....	68
7-c-Ear.....	69

<i>B-Effect of biological fertilizers</i>	71
1-Plant height.....	71
2-Ear height.....	72
3-Number of leaves / plant	72
4-Stem diameter	73
5-Leaf area of topmost ear.....	75
6-Fresh weight of maize plant organs.....	75
6-a-Leaves	75
6-b-Stem + sheathes + tassel.....	76
c-Ear.....	77
7-Dry weight of maize plant organs	77
7-a-Leaves	78
7-b-Stem + sheaths + tassel.....	78
7-c-Ear	80
<i>C-Interaction effect.....</i>	80
1-Effect of the interaction on ear height.....	81
2-Effect of the interaction on dry weight of stem + sheaths + tassel.	81
V-Photosynthesis pigments in leaf ear	84
<i>A-Effect of seedbed preparations</i>	84
<i>B-Effect of biological fertilizers</i>	86
IV-Flowering and fertility of maize plants	88
<i>A-Effect of seed bed preparation</i>	88
1-Time of tasseling and silking	88

2-Barren plants percentage	89
3-Percentage of plants carrying one or more than one ear.	89
<i>B-Effect of biological fertilizers</i>	91
1-Time of tasseling and silking	91
2-Barren plants percentage	91
3-Percentage of plants carrying one or more than one ear	92
IIV-Yield and its components	94
<i>A-Effect of seedbed preparation</i>	94
1-Length and diameter of ear	94
2-Number of rows per ear	95
3-Number of grains per row and per ear	96
4-Ear weight and grain weight per ear	96
5-100 – grain weight	97
6-Shelling percentage	98
7-Ear and grain yield per feddan	100
8-Straw yield per feddan	101
<i>B-Effect of biological fertilizers</i>	103
1-Length and diameter of ear	103
2-Number of rows per ear	103
3-Number of grains per row and per ear	104

4-Ear weight and grain weight per ear	105
5-100 – grain weight	106
6-Shelling percentage	106
7-Ear and grain yield per feddan	108
8-Straw yield per feddan	109
<i>C-Interaction effect</i>	111
IIIV:Simple correlation	113
-SUMMARY	119
-LITERATURE CITED	130
-ARABIC SUMMARY.	1-7
