INTRODUCTION	1
REVIEW OF LITERATURE	4
MATERIALS AND METHODS	25
RESULTS AND DISCUSSION	39
1. Plant Growth Regulators (PGRs)	39
I. GA ₃ and CCC by N levels Experiment	39
A. Effect of GA ₃ and CCC on vegetative growth parameters	39
B. Effect of GA ₃ and CCC on yield, yield components, and grain N uptake	41
C. Effect of N levels on vegetative growth parameters	43
D. Effect of N levels on yield, yield components, and grain N uptake	44
E. N levels by PGRs interactions	46
II. Ethephon and Primo PGRs Experiment	48
A. Vegetative growth parameters	48
B. Grain yield, stover yield, assimilate partitioning, and stalk lodging	53
C. Interaction effects	63
2. Fertilization	70
I. NPK Experiment	70
A. Effect of N levels on vegetative growth parameters	70
B. Effect of N levels on yield, yield components, and grain N uptake	72
C. Effect of P ₂ O ₅ levels on vegetative growth parameters	74
D. Effect of P ₂ O ₅ levels on yield, yield components, and grain N uptake	75
E. Effects of K ₂ O levels on growth, yield, and yield components	75
F. NPK interactions.	77
II. Unmanured and manured N response Experiments	79
A. Yield responses	79
B. N uptake responses	82
III. Economic analysis	85
