INTRODUCTION	1
REVIEW OF LITERATURE	3
I. Effect of differential wheat varieties	3
II. Effect of nitrogen fertilization	13
III. Effect of irrigation intervals	17
IV. Effect of antitranspirants.....	25
V. The interaction effects.....	30
MATERIALS AND METHODS	38
RESULTS AND DISCUSSION	52
A. First experiment.....	52
The performance of three new long spike wheat varieties under seven N-levels.....	52
I. Effect of wheat varieties and N-levels on some growth characters at 90 days from planting and growth analysis	52
1. Effect of wheat varieties on	52
2. Effect of nitrogen levels.....	55
3. Interaction effect between wheat varieties and N-levels	59
II. Effect of wheat varieties and N-levels on total chlorophyll and proline contents and grain growth parameters:	61
1. Effect of wheat varieties on	61
2. Effect of nitrogen levels.....	64

3. Interaction effect between wheat varieties and N-levels	66
III. Effect of wheat varieties and N-levels on yield and yield components	68
1. Effect of wheat varieties on	68
2. Effect of nitrogen levels.....	73
3. Interaction effect between wheat varieties and N-levels	80
IV. Effect of wheat varieties and N-levels on grains chemical content and some technological properties	84
1. Effect of wheat varieties on	85
2. Effect of nitrogen levels.....	87
3. Interaction effect between wheat varieties and N-levels	90
B. Second experimen	94
“Effect of irrigation intervals, wheat varieties and plant antitranspirant on yield and its quality”	94
I. Effect of irrigation intervals, wheat varieties and plant antitranspirants on growth characters and growth analysis.....	95
1. Effect of irrigation intervals.....	95
2. Effect of wheat varieties on	99
3. Effect of plant antitranspirants	102
4. Interaction effect between irrigation intervals and wheat varieties	105
5. Interaction effect between irrigation intervals and plant antitranspirants	108
6. Interaction effect between wheat varieties and	

plant antitranspirants.....	110
7. Interaction effect between the three studied factors.....	112

II. Effect of irrigation intervals, wheat varieties and plant antitranspirants on total chlorophyll and proline contents, stomata characters and grain

growth parameters.....	115
1. Effect of irrigation intervals.....	115
2. Effect of wheat varieties on	119
3. Effect of plant antitranspirants.....	121
4. Interaction effect between irrigation intervals and wheat varieties	124
5. Interaction effect between irrigation intervals and plant antitranspirants	126
6. Interaction effect between wheat varieties and plant antitranspirants.....	131
7. Interaction effect between the three studied factors.....	134

III. Effect of irrigation intervals, wheat varieties and plant antitranspirants on grain yield and yield components.....

components.....	136
1. Effect of irrigation intervals.....	136
2. Effect of wheat varieties on	142
3. Effect of plant antitranspirants	147
4. Interaction effect between irrigation intervals and wheat varieties	152
5. Interaction effect between irrigation intervals and plant antitranspirants	156

6. Interaction effect between wheat varieties and plant antitranspirants.....	161
7. Interaction effect between the three studied factors.....	163

IV. Effect of irrigation intervals, wheat varieties and plant antitranspirants on grains chemical contents and some technological properties	166
1. Effect of irrigation intervals.....	166
2. Effect of wheat varieties on	169
3. Effect of plant antitranspirants.....	172
4. Interaction effect between irrigation intervals and wheat varieties	174
5. Interaction effect between irrigation intervals and plant antitranspirants.....	177
6. Interaction effect between wheat varieties and plant antitranspirants.....	179
