INTRODUCTION	1
REVIEW OF LITERATURE	3
I. Effect of Tillage Operations on :	3
1. Soil properties	3
2. Soil salinity (E.C.)	8
3. Weed density	9
4. Wheat	12
II. Effect of Weed Control Treatments on :	16
1. Weeds	16
2. Wheat	21
MATERIALS AND METHODS	27
RESULTS AND DISCUSSION	33
I. Effect of Tillage Treatments, Methods of Weed Control and Their Interaction on Growth Characters of Wheat	33
1. Dry matter accumulation (g/0.05 m ²) at 60 days from sowing	33
2. Dry matter accumulation (g/0.05 m ²) at 120 days from sowing	37
3. Leaf area index at 60 days from sowing	40
4. Leaf area index at 120 days from sowing	44
5. Plant height at 60 days from sowing	48
6. Plant height at 120 days from sowing	52
II. Effect of Tillage Treatments, Methods of Weed Control and Their Interaction on Yield and Its Components	55
1. Number of spikes per one square meter	55
2. Weight of 1000 grains (g)	60
3. Number of spikelets per spike	64
4. Spike length (cm)	68
5. Number of grains per spike	71

	Page
6. Weight of spike (g)	75
7. Grain weight per spike (g)	79
8. Grain yield (kg/fad)	82
9. Straw yield (t/fad)	88
10. Plant height at harvest (cm)	93
III. Effect of Tillage Treatments, Methods of Weed Control and Their Interaction on the Spread of Weeds in Wheat	95
1. Number of weeds/m ² at 60 days from sowing	95
2. Number of weeds/m ² at 90 days from sowing	98
3. Number of weeds/m ² at 120 days from sowing	101
4. Fresh weight of total weeds (g/m ²) at 60 days from sowing	104
5. Fresh weight of total weeds (g/m ²) at 90 days from sowing	107
6. Fresh weight of total weeds (g/m ²) at 120 days from sowing	109
7. Dry weight of total weeds (g/m ²) at 60 days from sowing	112
8. Dry weight of total weeds (g/m ²) at 90 days from sowing	115
9. Dry weight of total weeds (g/m ²) at 120 days from sowing	118
IV. Effect of Tillage Treatments on Soil Properties at Harvest	120
1. Soil bulk density	120
2. Soil porosity percentage	123
3. Soil salinity	127
