CONTENTS

	Page
- INTRODUCTION	1
- REVIEW OF LITERATURE	
A- Chemical composition of pork and mutton	
1- Chemical composition of pork	
2- Chemical composition of lard	
3- Chemical composition of mutton	
4- Chemical composition of sheep fat	
B- Detection of Lard	
1- Enzymatic hydrolysis of triglycerides by pan- creatic lipase	
2- Methods of fat hydrolysis by pancreatic lipase.	
3- Separation of hydrolysate	
4- Methods for separation of triglycerides	
5- Glyceride structure	
6- Theories of glyceride structure	
7- Application on lard	
C- Microscopic observation on fat crystals	
- MATERIALS AND METHODS	
<u>Materials</u>	
Lean meat	
Fat tissues	
Canning	
Sausage	
Imported products	
<u>Methods</u>	

- RESULTS AND DISCUSSION
- I- Composition of fresh mutton and pork
- 1- Chemical composition
- 2- Physical and chemical properties of fat
- 3-(a) Fatty acids composition of 2-monoglycerides
and triglycerides in sheep fat and lard....
- (b) Palmitic acid enrichment factor
- (c) The unsaturation ratio
- (d) Other ratios based on the fatty acids
composition of 2-monoglycerides
- (e) Glyceride pattern of lard and sheep fat ...
- 4- Fractionation of triglycerides by thin layer
chromatography
- 5- Fat crystals
- II- Canned mutton and pork products
- 1-(a) Fatty acids composition of triglycerides and
2-monoglycerides in canned meat products ...
- (b) Palmitic acid enrichment factor
- (c) The unsaturation ratio
- (d) Total C_{16} /total C_{18} fatty acids and saturated/
unsaturated fatty acids in 2-monoglycerides of
fat, extracted from canned meat products
- (e) Glyceride pattern of fat
- 2- Fractionation of triglycerides by thin layer
chromatography
- 3- Fat crystals
- III- Mutton and pork sausages
- 1-(a) Fatty acids composition of triglycerides and
2-monoglycerides in mutton and pork sausages.

(b) Palmitic acid enrichment factor.....	
(c) The unsaturation ratio	
(d) Total $C_{16:0}$ /total $C_{18:0}$ fatty acids and saturated/ unsaturated fatty acids in 2-monoglycerides..	
(e) Glyceride pattern of fat	
2- Fractionation of triglycerides by thin layer chromatography	
3- <u>Fat crystals</u>	
Fresh sausages	
Smoked sausages	
Canned sausages	
IV- Canned mutton meat (market sample).....	
1- Fat crystals	
2- Fraction of fat triglycerides by thin layer chromatography	
3-(a) Fatty acids composition of triglycerides and 2-monoglycerides in imported canned mutton sample	
(b) The palmitic acid enrichment factor	
(c) The unsaturation ratio	
(d) Total $C_{16:0}$ /total $C_{18:0}$ fatty acids and saturated/ unsaturated fatty acids in 2-monoglycerides..	
(e) Glyceride pattern of fat
