LIST OF TABLES.....	vii
LIST OF FIGURES.....	x
CHAPTER.....	
I. INTRODUCTION.....	1
1.1. By-products of food industry.....	1
1.2. Purpose of study.....	5
II. REVIEW OF LITERATURE.....	7
2.1. Potential utilization of by-products of citrus processing.....	7
2.2. Citrus peel oils.....	13
2.2.1. Economic importance and uses.....	13
2.2.2. Recovery of citrus peel oils.....	16
2.2.3. Physico-chemical properties of citrus peel oils.....	19
2.2.4. Chemical constituents of citrus peel oils..	19
✓ 2.3. <u>Citrus pectic substances</u>	29
2.3.1. <u>Extraction of pectic substances</u>	30
2.3.2. <u>Characterization of citrus pectic substances</u> ..	36
2.4. <u>Citrus seed oils</u>	39
2.4.1. Physical and chemical properties of citrus seed oils.....	41
2.4.2. Fatty acids composition of citrus seed oils.	41
2.4.3. Unsaponifiable matter of citrus seed oils..	45
2.5. Citrus pulp meal.....	47
2.6. Citrus seed meal or citrus press cake.....	50
III. MATERIALS AND METHODS	53
3.1. Materials.....	53
3.2. Preparation of raw materials in the laboratory.	53
3.3. Preparation and characterization of volatile oils obtained from citrus peels.....	54
3.3.1. Determination of peel oil content.....	54
3.3.2. Extraction of volatile oils.....	54
3.3.2.1. Water and steam distillation.....	54
3.3.2.2. Cold-pressed essential oils.....	55

	<u>Page</u>
3.3.3. Physical properties of volatile oils.....	55
3.3.4. Determination of chemical constants of volatile oils.....	56
3.3.5. Gas liquid chromatography (GLC) analysis.....	56
3.4. Preparation and characterization of citrus seed oils.....	56
3.4.1. Determination of oil content in citrus seeds.....	56
3.4.2. Extraction of citrus seed oils.....	57
3.4.3. Determination of the physical and chemical characteristics of citrus seed oils.....	57
3.4.4. Gas liquid chromatographic analysis (GLC).....	57
3.4.4.1. Determination of fatty acids by (GLC).....	57
3.4.4.1.1. Preparation of diazomethane.....	58
3.4.4.1.2. Methylation of free fatty acids.....	58
3.4.4.1.3. Separation of methylesters of free fatty acids by GLC.....	59
3.4.4.1.4. Standard fatty acids.....	59
3.4.4.1.5. Identification and quantitative deter- mination of fatty acids.....	60
3.4.4.2. Unsaponifiable matter.....	60
3.4.4.2.1. Separation of unsaponifiable matter by GLC.....	60
3.4.4.2.2. Standards for unsaponifiable materials.....	61
3.4.4.2.3. Identification and quantitative deter- mination of unsaponifiable mater.....	61
3.5. Preparation and characterization of pectic sub- stances in citrus wastes.....	62
3.5.1. Determination of pectic substances in citrus peel and pulp.....	62
3.5.2. Extraction of pectic substances.....	63
3.5.3. Clarification and concentration.....	63
3.5.4. Precipitation of crude pectin.....	64
3.5.5. Chemical analysis of pectin prepared from citrus residues.....	64
3.5.5.1. Determination of the humidity.....	64
3.5.5.2. Determination of ash content.....	65
3.5.5.3. Determination of acetyl ester groups.....	65

	<u>Page</u>
3.5.5.4. Methoxyl content.....	65
3.5.5.5. Determination of reducing power (Ferricy- anide number).....	65
3.5.5.6. Determination of anhydrogalacturonic acid (A.G.A.).....	66
3.5.6. Physical analysis of prepared pectins.....	66
3.5.6.1. Description of pectin powder.....	66
3.5.6.2. Estimation of viscosity by determination of flow time.....	66
3.5.6.3. Determination of Jelly grade.....	66
3.5.6.4. Optical rotation measurement.....	67
3.5.6.5. Molecular weight determination.....	68
3.5.7. Determination of sugar content.....	68
3.5.7.1. Hydrolysis of pectin.....	68
3.5.7.1.1. Qualitative determination of sugars in pectin hydrolyzate by paper chromato- graphy.....	68
3.6. Chemical characterization of citrus seed meal..	69
3.6.1. Proximate chemical composition of seed meals.	69
3.6.2. Determination of protein fractions based on solubility.....	69
3.7. Determination of mineral content of citrus waste materials and their prepared products.....	70
3.7.1. Preparation of samples.....	70
3.7.2. Spectrophotometric determination of phos- phorus.....	71
3.7.3. Determination of mineral matter by atomic absorption spectroscopy.....	71
3.7.3.1. Solutions and reagents.....	71
3.7.3.2. Preparation of standard solution.....	72
3.7.3.3. Apparatus.....	72
3.7.3.4. Operating conditions.....	73
3.7.3.5. Calibration curves.....	73
3.7.3.6. Calculation.....	73
IV. RESULTS AND DISCUSSION.....	75
Part I: <u>By-products obtained from different citrus fruits</u>	77

	<u>Page</u>
4.1. Amount of juice and components of residue obtained from different citrus fruits.....	77
Part II. <u>Citrus peel oils</u>	81
4.2. Essential oil content in different citrus fruits.	81
4.3. Physical and chemical properties of different citrus peel oils.....	83
4.3.1. Physical properties.....	84
4.3.1.1. Odour and color.....	84
4.3.1.2. Specific gravity (sp. gr.).....	84
4.3.1.3. Refractive index.....	87
4.3.1.4. Optical rotation.....	88
4.3.1.5. Solubility in alcohol.....	89
4.3.2. Chemical properties.....	90
4.3.2.1. Acid number.....	90
4.3.2.2. Ester content.....	91
4.3.2.3. Aldehyde content.....	92
4.4. Gas liquid chromatographic analysis of citrus peel oil.....	95
4.4.1. Volatile constituents separated from different citrus peel oils obtained by water and steam distillation.....	96
4.4.1.1. Terpene hydrocarbons.....	103
4.4.1.2. Oxygenated compounds.....	106
4.4.1.3. Unidentified compounds.....	109
4.4.2. Volatile constituents separated from different citrus oils obtained by cold pressing tech- nique.....	110
4.4.2.1. Terpene hydrocarbons.....	110
4.4.2.2. Oxygenated compound.....	118
4.4.2.3. Unidentified compounds.....	121

Part III. <u>Characterization of citrus pectin pomace.</u>	Page 122 ✓
4.5. Proximate chemical composition of dried starting material for pectin preparation.....	126
4.6. Estimation of amounts and yield of pectin pomace	129
4.6.1. Total pectic substance and their fractions in dried citrus waste materials.....	129
4.6.2. Yield of pectin prepared from dried citrus waste materials.....	132
4.7. Physical properties of citrus pectin prepara- tion.....	135
4.7.1. Molecular weight.....	135
4.7.2. Jelly grade.....	138
4.7.3. Optical rotation.....	140
4.7.4. Color of dry pectin powder.....	142
4.7.5. Physical properties of 0.2% pectin solution.	142
4.8. Chemical properties of citrus pectin preparation	145
4.8.1. Moisture content.....	145
4.8.2. Ash content.....	147
4.8.3. Anhydrogalacturonic acid content (A.G.A.)...	150
4.8.4. Methoxyl content.....	151
4.8.5. Acetyl group content.....	154
4.8.6. Reducing power.....	156
4.9. Constituent neutral sugars of pectin substances of citrus.....	158
4.10. Mineral content.....	162
4.10.1. Mineral content of dried citrus waste materials.....	162
4.10.2. Mineral content of pectin preparations.....	164
Part IV. <u>Characterization of citrus seed oils</u>	171
4.11. Estimation of yield in citrus seeds and their oils.....	171
4.12. Physical and chemical properties of citrus seed oils.....	174
4.12.1. Refractive index.....	176
4.12.2. Acid number.....	176

	<u>Page</u>
4.12.3. Peroxide number.....	177
4.12.4. Iodine number.....	177
4.12.5. Saponification value.....	178
4.12.6. Unsaponifiable matter.....	179
4.13. Fatty acids composition of citrus seed oils as determined by GLC analysis.....	180
4.14. Composition in unsaponifiable matter as determined by GLC analysis.....	188
Part V. <u>Characterization of citrus seed meal</u>	198
4.15. Amount of seed recovered from citrus by- products.....	198
4.16. Chemical composition of whole seed meals and components of seeds.....	200
4.17. Chemical analysis of defatted seed meals....	203
4.18. Mineral content of whole citrus seed meals and components of seeds.....	205
4.19. Classification of citrus seed proteins.....	208
V. SUMMARY	216
VI. REFERENCES.....	238
APPENDIX A	268
ARABIC SUMMARY.....
