

CONTENTS

	PAGE
I. INTRODUCTION	1
II. REVIEW OF LITERATURE	3
2.1. Chemical composition of orange, mango and guava	3
2.2. Enzyme inactivation in orange, mango and guava	6
III. MATERIALS AND METHODS	20
3.1. Materials	20
3.1.1. Preparation of mango nectar	20
3.1.2. Preparation of guava nectar.....	21
3.1.3. Preparation of orange nectar.....	21
3.2. Analytical methods	22
3.2.1. Proximate chemical	22
3.2.2. Total soluble solids	22
3.2.3. Titratable acidity and pH value	22
3.2.4. Determination of sugars	22
3.2.5. Determination of carotenoids	23
3.2.6. Determination of enzyme activity	23
3.2.6.1. Pectin methylesterase enzyme	23
3.2.6.2. Peroxidase enzyme	24
3.2.6.3. Polyphenoloxidase enzyme	25
3.2.7. Estimation slowest heating point inside the cans	26
3.2.8. Determination of heat penetration data	26
3.2.9. Temperature conversion for different initial and retort temperature	27
3.2.10. Calculation the percentage of enzyme activity retained at end of process	28
3.3. Sensory evaluation	29
IV. RESULTS AND DISCUSSION	30
4.1. Major constituents of edible portion of mango, guava and orange	30
4.2. Part I: Mango nectar	32

	PAGE
4.2.1. Effect of canning processing steps on chemical composition of mango nectar	32
4.2.2. Effect of canning process on enzyme activity of mango nectar	36
4.2.2.1. Pectinmethylesterase activity	36
4.2.2.2. Peroxidase and polyphenoloxidase activity ...	38
4.2.3. Evaluation of thermal process for mango nectar .	38
4.2.4. Sensory evaluation of mango nectar	46
4.3. Part II: Guava nectar	48
4.3.1. Effect of canning processing steps on chemical composition of guava nectar	48
4.3.2. Effect of canning process on enzyme activity of guava nectar	52
4.3.2.1. Pectinmethylesterase activity	52
4.3.2.2. Peroxidase and polyphenoloxidase activity ...	52
4.3.3. Evaluation of thermal process for guava nectar .	54
4.3.4. Sensory evaluation of guava nectar	59
4.4. Part III: Orange nectar	64
4.4.1. Effect of canning processing steps on chemical composition of orange nectar	64
4.4.2. Effect of canning process on enzyme activity of orange nectar	68
4.4.2.1. Pectinmethylesterase activity	68
4.4.2.2. Peroxidase and polyphenoloxidase activity ...	70
4.4.3. Evaluation of thermal process for orange nectar .	70
4.4.4. Sensory evaluation of orange nectar	74
V. SUMMARY	79
VI. REFERENCES	88
VII. APPENDIX	98
VIII. ARABIC SUMMARY
