INTRODUCTION	1
REVIEW OF LITERATURE	7
1. Effect of antimicrobials and antioxidants against <i>E. coli</i> O157:H7 ATCC 69373 and other microorganisms	7
1.1. Effect of antimicrobial compounds on microbial growth	7
1.1.1. Sodium lactate	7
1.1.2. Sodium acetate	9
1.1.3. Sodium citrate	10
1.1.4. Tri-sodium phosphate	10
1.1.5. Sorbic acid and sorbates	12
1.2. Effect of phenolic antioxidants compounds on microbial growth	16
2. Effect of combined antimicrobials and antioxidants against <i>E. coli</i> O157:H7 ATCC 69373 and other microorganisms	19
3. Chemical composition of raw fish	22
4. Chemical freshness indices of fish.....	25
4.1. Total volatile nitrogen	26
4.2. Trimethylamine-nitrogen	27
4.3. Thiobarbituric acid	28
5. Physical properties of raw fish	29
5.1. pH value.....	29
5.2. Optical density of gills extract	29
5.3. Optical density of muscles extract	29
5.4. Pigments concentration	30
5.5. Refractive index of eye fluid	30
5.6. Water holding capacity and plasticity	31
5.7. Cooking loss	31
6. Microbiological aspects of raw fish	32
7. Sensory evaluation of fish	33
7.1. Sensory evaluation of raw fish	33
7.2. Sensory evaluation of cooked fish	34
8. Effect of some dipping treatments on the quality and storage stability of fish	35
8.1. Cold storage of fish	37
8.1.1. Effect of some dipping treatments and cold storage on the quality and fish stability.....	39
8.2. Frozen storage	41
8.2.1. Effect of dipping treatments and frozen storage on quality and fish stability	42

MATERIALS AND METHODS	45
1. Materials	45
1.1. Raw materials	45
1.2. Additives.....	45
1.3. Cultures	45
2. Methods.....	46
2.1. Cultures propagation	46
2.2. Effect of antimicrobials and antioxidants against <i>E. coli</i> O157:H7 ATCC 69373 at 37°C	46
2.3. Effect of combined antimicrobials and antioxidant against <i>E.</i> <i>coli</i> ATCC 69373 at 37°C and <i>Pseudomonas aeruginosa</i> at 20°C.....	47
3. Fish treatments	48
3.1. Cold storage	48
3.2. Frozen storage	49
4. Analytical methods	50
4.1. Chemical analysis	50
4.2. Freshness tests	50
4.2.1. Total volatile nitrogen and Trimethylamine	50
4.2.2. Thiobarbituric acid value	50
4.3. Physical properties	51
4.3.1. pH value	51
4.3.2. Optical density of gills extract	51
4.3.3. Optical density of muscles extract	51
4.3.4. Pigments concentration	51
4.3.5. Refractive index of eye's fluids	52
4.3.6. Water holding capacity and plasticity	52
4.3.7. Determination of cooking loss	52
4.3.7.1. Cooking method	52
4.3.7.2. Measuring of cooking loss	52
5. Microbiological assay	53
5.1. Conventional plating methods	53
5.2. The four-culture method	53
5.3. Proteolytic bacteria	56
5.4. Lipolytic bacteria	56
5.5. Moulds and yeasts	56
5.6. Total psychrophilic bacteria	57
5.7. <i>E. coli</i> O157:H7 ATCC 69373	57
6. Sensory evaluation	57
7. Statistical analysis	58

RESULTS AND DISCUSSION	59
PART I:	59
1...Effect of antimicrobials and antioxidants at different concentrations against <i>E. coli</i> O157:H7 ATCC 69373 at 37°C	59
2. Antimicrobial effect of combined antimicrobials and antioxidant against <i>E. coli</i> O157:H7 ATCC 69373 at 37°C	66
3. Antimicrobial effect of combined antimicrobials and antioxidant against <i>P. aeruginosa</i> at 20°C	69
PART II:	72
Effect of cold storage alone or accompanied with dipping treatments on Bolti fish	72
1. Chemical composition of untreated and treated chilled Bolti fish	72
2. Chemical freshness indices of untreated and treated chilled Bolti fish	79
2.1. Total volatile nitrogen	79
2.2. Trimethylamine	80
2.3. Thiobarbituric acid	81
3. Physical properties of untreated and treated chilled Bolti fish	85
3.1. pH value	85
3.2. Optical density of gills extract	85
3.3. Optical density of muscles extract	87
3.4. Pigments concentration	92
3.5. Refractive index of eye fluid	92
3.6. Water holding capacity.....	93
3.7. Plasticity.....	94
3.8. Cooking loss.....	95
4. Microbiological quality attributes of untreated and treated chilled bolti fish	98
5. Sensory evaluation of untreated and treated chilled Bolti fish	107
5.1. Sensory evaluation of raw Bolti fish	107
5.2. Sensory evaluation of cooked Bolti fish	116
PART III:	121
Effect of frozen storage alone or accompanied with dipping treatment on Bolti fish	121
1. Chemical composition of untreated and treated frozen Bolti fish.....	121

	Page
2. Chemical freshness indices of untreated and treated frozen Bolti fish	128
2.1. Total volatile nitrogen	128
2.2. Trimethylamine	130
2.3. Thiobarbituric acid	130
3. Physical properties of untreated and treated frozen Bolti fish	132
3.1. pH value	132
3.2. Optical density of gills extract.....	133
3.3. Optical density of muscles extract	133
3.4. Pigments concentration	134
3.5. Refractive index of eye fluid.....	139
3.6. Water holding capacity.....	139
3.7. Plasticity.....	140
3.8. Cooking loss.....	140
4. Microbiological quality attributes of different untreated and treated frozen Bolti fish	142
5. Sensory evaluation of untreated and treated frozen Bolti fish	149
5.1. Sensory evaluation of raw Bolti fish	149
5.2. Sensory evaluation of cooked Bolti fish	155
