

Table of contents

	Page
1- INRODUCTION -----	1
2- LETERATURE REVIEW -----	4
2.1- Taxonomy of the genus <i>Bacillus</i> -----	4
2.2- Incidence of <i>B. cereus</i> in foods-----	5
2.3- Microbial survey of some foods-----	15
2.4- Toxin production by <i>Bacillus spp.</i> -----	22
2.5- Enzymatic activities for <i>Bacillus cereus</i> and other <i>Bacillus spp.</i> -----	33
2.6- Antibiotic production from <i>Bacillus spp.</i> -----	42
2.7- Susceptibility and resistant of <i>Bacillus spp.</i> to antibiotic-----	45
2.8- Growth and survival of <i>B. cereus</i> -----	48
3- MATERIALS AND METHODS -----	57
3.1- Materials -----	57
3.1.1- Samples-----	57
3.1.2- Strains-----	57
3.2- Methods -----	57
3.2.1- Samples preparation-----	57
3.2.2- Microbiological analysis -----	57
3.2.3- Isolation and Identification of <i>B. cereus</i> -----	58
3.2.4- Toxin production from <i>B. cereus</i> and other <i>Bacillus spp.</i> -----	61
3.2.5- Enzymatic activity for <i>B. cereus</i> and other <i>Bacillus spp.</i> -----	62
3.2.6- Antagonistic activity of <i>Bacillus spp.</i> -----	64
3.2.7- Susceptibility of <i>Bacillus spp.</i> to antibiotic-----	64
3.2.8- Growth and survival for <i>B. cereus</i> -----	65
3.2.8.1- Determination of growth temperatures for <i>Bacillus spp.</i> -----	65
3.2.8.2- Growth of a rifampicin resistant strain, <i>B. cereus</i> in Asian rice based confectionery product-----	65
3.2.8.2.1- Selection for rifampicin resistant <i>B. cereu</i> -----	65
3.2.8.2.2- Rice layers-----	66
3.2.8.2.3- Preparation of spore suspension-----	67

	Page
3.2.8.2.4- Effect of cooking and storage temperature of rice layer on the growth of <i>B. cereus</i> spores-----	67
3.2.8.2.5- Effect of some preservatives of <i>B. cereus</i> growth on rice layers-----	67
3.2.8.2.6- Sensory evaluation for rice product-----	67
3.2.8.3- Effect of sodium chloride and pH on the growth of <i>B. cereus</i> -----	68
4- RESULTS AND DISCUSSION -----	69
4.1- Microbiological survey of foods-----	69
4.2- Identification of <i>Bacillus spp.</i> -----	86
4.3- Toxin production by <i>B. cereus</i> and other <i>Bacillus spp.</i> -----	93
4.4- Enzymatic activity for <i>B. cereus</i> and other <i>Bacillus spp.</i> -----	99
4.5- Antagonistic activity for <i>Bacillus spp.</i> -----	106
4.6- Susceptibility of <i>B. cereus</i> and other <i>Bacillus spp.</i> to antibiotic -----	110
4.7- Growth and survival of <i>B. cereus</i> -----	113
4.7.1- Growth temperature for <i>Bacillus spp.</i> -----	113
4.7.2- Growth of <i>B. cereus</i> in Asian rice based confectionery product-----	116
4.7.3- Effect of sodium chloride and pH on the growth of <i>B. cereus</i> -----	133
5- SUMMARY -----	140
6- REFERENCES -----	144
7- ARABIC SUMMARY
