

ACKNOWLEDGMENT

=====

I wish to express my sincere appreciation to those who have contributed inspiration and assistance in this study .

My sincere indebtedness appreciation to Prof. Dr. El-Mansy , H.A.H. , Food Technology Dep. , Faculty of Agriculture , Moshtohor , Zagazig University , for suggesting the problem and for this kind and continuous supervision and unfaliling encouragement .

Appreciation is also extended to Dr. H. Khalaf , Associate prof. of Food Technology Dep. , Faculty of Agriculture , Moshtohor , Zagazig University, for his help and continuous encouragement .

Also , I wish to express my thanks to the head and staff members of vegetables Dep. and Center Lab. of Horticulture Research Institute for their help and great encouragement .

INTRODUCTION	I
REVIEW OF LITERATURE	4
I. Effect of pretreatment method before freezing and dry- ing on the quality of frozen and dried vegetables	4
1.1. Effect of blanching	4
1.2. Effect of sulfuring	13
2. Effect of processing and storage conditions on the quality of frozen and dried vegetables	20
2.1. Effect of freezing and storage on the quality of frozen vegetables	20
2.2. Effect of dehydration and storage on the quality of dried vegetables	53
2.3. Effect of different processing (freezing and dry- ing) and storage on sensory characteristics	65
MATERIALS AND METHODS	71
1. Materials	71
2. Methods	71
A. Freezing process	71
B. Dehydration process	72

	Page
C. Analytical methods	73
1. Chemical composition	73
2. Total sulfur dioxide	75
3. Determination of enzymatic activities	76
4. Microbiological analysis	79
5. Organoleptic tests	81
D. Reconstitution of dried okra	82
E. Statistical analysis	84
RESULTS AND DISCUSSION	88
Part I : Freezing	88
Effect of processing steps on the quality of frozen green peas , green beans and okra	88
1. Effect of blanching	88
a. Effect of blanching on the chemical composition	88
b. Effect of blanching on the chlorophylls , ascorbic acid and carotene	96
c. Effect of blanching on enzymes activity	107
d. Effect of blanching on microbial load	116
2. Effect of freezing and storage	122
a. Effect of freezing and storage periods on the chemical composition of frozen vegetables	122

b.	Effect of freezing and storage periods on chlorophylls , ascorbic acid and carotene	I33
c.	Effect of freezing and storage periods on enzymes activities	I48
d.	Effect of freezing and storage periods on microbial load of frozen peas , beans and okra	I57
e.	Sensory evaluation of frozen peas , beans and okra ...	I65
Part II : Dehydration of okra		I71
Effect of processing steps on the quality of dried okra		I71
1.	Effect of blanching	E71
a.	Effect of blanching on the chemical composition of okra.	I71
b.	Effect of blanching on the chlorophylls , ascorbic acid and carotene	I73
c.	Effect of blanching on the microbial load of okra	I75
2.	Effect of dehydration and storage periods on dried okra .	I78
a.	Effect of dehydration and storage periods on the chemical composition	I78
b.	Effect of dehydration and storage periods on chlorophylls , ascorbic acid and carotene	I88
c.	Effect of dehydration and storage periods on SO ₂ residue	294

	Page
d. Effect of dehydration and storage periods on the microbiological of dried okra	206
f. Reconstitution of dried okra	209
g. Organoleptic evaluation of dried okra	216
