INTRODUCTION.....	1
I. REVIEW OF LITERATURE.....	2
I. Effect of plant density on growth, yield and chemical composition of safflower.....	2
II. Effect of N-fertilizer on growth, yield and chemical composition of safflower.....	10
III. Effect of P-fertilizer on growth, yield and chemical composition of safflower.....	19
MATERIALS AND METHODS.....	21
RESULTS AND DISCUSSION.....	26
I. Effect of plant density on growth characters, yield and chemical content of safflower.....	26
1. Effect of plant density on growth characters.....	26
1.1. Plant height.....	26
1.2. Length of basic three internodes.....	26
1.3. Number of internodes/main stem.....	27
1.4. Stem diameter.....	27
1.5. Number of branches/plant.....	30
1.6. Height of the first branch.....	30
1.7. Number of leaves/plant.....	31
1.8. Dry weight of different parts/plant.....	31
1.9. Leaf area index (L.A.I.).....	33
1.10. Specific leaf weight (S.L.W.).....	33
2. Effect of plant density on yield and yield components.....	33
2.1. Number of heads/plant.....	33
2.2. Head diameter.....	34
2.3. Number of seeds/head.....	34
2.4. Weight of 1000-seed.....	36
2.5. Weight of seeds/plant.....	36
2.6. Seed yield per feddan.....	37
2.7. Straw yield feddan.....	38
2.8. Biological yield per feddan.....	38

	Page
3. Effect of plant density on chemical of seeds.....	39
3.1. Oil percentage and oil yield/fed.	39
3.2. Protein percentage and protein yield/fed.	41
3.3. Oil characters.....	41
II. Effect of N-fertilizer on growth characters, yield and chemical content of safflower.....	42
1. Effect of N-fertilizer on growth characters.....	42
1.1. Plant height.....	42
1.2. Length of basic three internode.....	43
1.3. Number of internodes/main stem.....	43
1.4. Stem diameter.....	46
1.5. Number of branches/plant.....	46
1.6. Height of the first branch.....	46
1.7. Number of leaves/plant.....	47
1.8. Dry weight of different parts/plants.....	49
1.9. Leaf area index (L.A.I.).....	49
1.10. Specific leaf weight (S.L.W.).....	49
2. Effect of N-fertilizer on yield and yield components.....	49
2.1. Number of heads/plant.....	50
2.2. Head diameter.....	50
2.3. Number of seeds/head.....	52
2.4. Weight of 1000-seed.....	52
2.5. Weight of seeds/plant.....	53
2.6. Seed yield per feddan.....	54
2.7. Straw yield per feddan.....	54
2.8. Biological yield	55
3. Effect of N-fertilizer on chemical of seeds.....	55
3.1. Oil percentage and oil yield (Kg/fed.).....	55
3.2. Protein percentage and protein yield (Kg/fed.).....	57
3.3. Oil characters.....	57
- Refractive Index.....	57
- Acid value.....	57

	Page
- Iodine value.....	57
- Sapon value.....	58
III. Effect of P-fertilizer on growth characters, yield and chemical content of safflower.....	59
1. Effect of P-fertilizer on growth characters.....	59
1.1. Plant height.....	59
1.2. Length of basic three internodes.....	59
1.3. Number of internodes/main stem.....	60
1.4. Stem diameter.....	60
1.5. Number of branches/plant.....	63
1.6. Height of first branch	63
1.7. Number of leaves/plant.....	63
1.8. Dry weight of different parts/plant	64
1.9. Leaf area index (L.A.I.).....	64
1.10. Specific leaf weight (S.L.W.).....	66
2. Effect of P-fertilizer on yield and yield components.....	66
2.1. Number of heads/plant.....	66
2.2. Head diameter.....	66
2.3. Number of seeds/head.....	67
2.4. Weight of 1000-seed	67
2.5. Weight of seeds/plant.....	67
2.6. seed yield per feddan.....	69
2.7. Straw yield per feddan.....	70
2.8. Biological yield feddan.....	71
3. Effect of P-fertilizer on chemical of seeds.....	71
3.1. Oil percentage and oil yield (Kg/fed.).....	71
3.2. Protein percentage and protein yield (Kg/fed.).....	71
3.3. Oil characters.....	73
- Refractive Index.....	73
- Acid value.....	73
- Iodine value.....	73
- Sapon value.....	73

IV. Effect of the interactions.....	74
1. Effect of the interaction of plant density and N-fertilizer on growth characters, yield and chemical content of safflower.	74
1.1. Growth characters.....	74
1.1.1. Plant height.....	74
1.1.2. Number of branches/plant.....	74
1.1.3. Height of first branche	74
1.1.4. Weight of leaves and stem per plant.....	77
1.1.5. L.A.I. and S.L.W.	77
1.2. Yield and yield components.....	77
1.2.1. Number of heads/plant.....	77
1.2.2. Head diameter.....	79
1.2.3. Seed yield per plant.....	79
1.2.4. Weight of 1000-seed.....	79
2. Effect of the interaction of plant density and P-fertilizer on growth characters yield and chemical content of safflower.	80
2.1. Growth characters.....	80
2.1.1. Plant height.....	80
2.1.2. Length of basic internodes.....	80
2.1.3. Stem diameter.....	80
2.1.4. Number of internodes/ main stem.....	83
2.1.5. Number of leaves/plant.....	83
2.1.6. Number of branches/plant.....	83
2.1.7. Dry weight of stem/plant.....	83
2.1.8. Dry weight of roots/plant.....	84
2.1.9. Leaf area index (L.A.I.).....	84
2.1.10. Specific leaf weight (S.L.W.).....	84
2.2. Yield and yield components.....	84
2.2.1. Number of heads/plant.....	84
2.2.2. Weight of seeds/plant.....	86
2.2.3. Weight of 1000-seed.....	86
2.2.4. Seed yield/fed.	86
3.1. Oil characters.....	87
3.1.1. Acid value.....	87
3.1.2. Sapon value.....	87

	Page
3. Effect of the interaction of N-and P-fertilizer on growth characters, yield and chemical content of safflower.....	87
3.1. Growth characters.....	87
3.1.1. Length of basic internodes.....	87
3.1.2. Number of internodes/main stem.....	87
3.1.3. Number of leaves/plants.....	90
3.1.4. Dry weight of safflower plant.....	90
3.1.5. Leaf area index (L.A.I.).....	90
3.1.6. Specific leaf weight (S.L.W.).....	90
3.2. Yield and yield components.....	92
3.2.1. Head diameter.....	92
3.2.2. Seed yield/fed.....	92
3.3. Oil characters.....	93
3.3.1. Acid value.....	92
4. Effect of the interaction of plant density, N-and P-fertilizer on growth characters, yield and chemical of safflower.....	93
4.1. Growth characters.....	93
4.1.1. Stem diameter.....	93
4.1.2. Height of first branches.....	93
4.1.3. Leaf area index (L.A.I.).....	93
4.2. Yield and yield components.....	93
4.2.1. Head diameter.....	93
4.2.2. Weight of 1000-seed.....	97
