1-INTRODUCTION	1
2-REVIEW OF LITERATURE	4
I – Application of ultrafiltration technology to hard cheese making.....	4
- Low concentrated retentates.....	5
- Medium – concentrated retentates.....	10
a-Cheddar cheese.....	10
b-Ras cheese.....	17
c– The use of calcium chloride.....	18
II – The use recombined concentrated milk in hard cheese making.....	20
III– Proteolysis, ripening characteristics and acceleration ripening of concentrated milk-cheese.....	21
a- Ultrafiltered milk-cheese.....	21
b- Recombined concentrated milk –cheese.....	26
IV- Probiotic ultrafiltered and recombined concentrated milk cheese.....	26
3 – MATERIALS AND METHODS	
- MATERIALS.....	31
- METHODS.....	32
4-RESULTS ANS DISCUSSION	
Part I: Potential of making Ras cheese from concentrated milk by ultrafiltration and recombined milk techniques...	41

Part II: Accelerating ripening of probiotic Ras cheese made from concentrated milk by ultrafiltration or recombination technique.....	116
