

Index

	Page
1. Introduction.....	1
2. Review of Literature.....	5
2.1 Chemical properties of citrus fruit juices	5
2.1.1 Orange juice	5
2.1.2 Mandarin juice.....	9
2.1.3 Lemon juice.....	12
2.1.4 Lime juice	12
2.1.5 Grapefruit juice	13
2.2 Fruit blend juices	16
2.3 Storage.....	21
2.4 Sport drinks.....	23
3. Materials and Methods.....	31
3.1 <i>Materials</i>	31
3.2 Processing.....	31
3.2.1 Citrus juices.....	31
3.2.2 Citrus blend	32
3.2.3 Sport drinks.....	32
3.3 Methods of analysis	33
3.3.1 Determination of moisture.....	33
3.3.2 Determination of total soluble solids.....	33

	Page
3.3.3 Determination of sugars.....	33
3.3.4 Determination of total acidity and pH values.....	34
3.3.5 Determination of ascorbic acid.....	35
3.3.6 Determination of total pectin.....	35
3.3.7 Determination of total carotenoids.....	35
3.3.8 Determination of formol number.....	35
3.3.9 Dtermination of ash.....	36
3.3.10 Determination of minerals.....	36
3.3.11 Determination of relative viscosity.....	36
3.3.12 Determination of serium color.....	37
3.3.13 Determination of browning index.....	37
3.3.14 Determination of caloric value.....	37
3.3.15 Sensory evaluation.....	38
3.3.16 Statistical analysis.....	38
3.3.17 Total plate count.....	38
3.3.18 Mould and Yeast.....	39
3.3.19 Coliform group.....	39
4. Results and Discussion.....	40
4.1 Chemical constituents of citrus juices.....	40
4.2 Chemical constituents of fresh citrus blend juice and citrus blend drink for sports.....	52

	Page
4.3 Chemical constituents of sport drinks during storage	73
4.3.1 Moisture content.....	74
4.3.2 Total soluble solids.....	77
4.3.3 Sugars.....	77
4.3.4 Total acidity.....	85
4.3.5 Ascorbic acid.....	88
4.3.6 Total carotenoids.....	91
4.3.7 Pectic substances.....	91
4.3.8 Formol number.....	92
4.3.9 Serium color.....	97
4.3.10 Browning index.....	98
4.3.11 Relative viscosity.....	107
4.3.12 Microbiological examination.....	115
4.3.13 Organoleptic evaluation.....	115
5. Summary.....	117
6. References.....	123
7. Arabic summary.
