	Page
- ACKNOWLEDGMENT	i
- CONTENTS	iv
- List of Tables	vi
- List of Figures	x
I. Introduction	1
II. Review of Literature	4
II.1. Explant characteristics	4
II.2. Surface sterilization of Explants	8
II.3. Media components	9
II.4. Treatments and factors affecting releasing of Phenolic compounds and inducing browning .	17
III. MATERIALS AND METHODS	22
III.1. Experiments for investigating possibility of solving some technical problems	25
III.2. The Morphogenesis of Peach Shoot tip and node cutting	28
III.3. Determination of phenols compounds	34
IV. RESULTS AND DISCUSSION	37
IV.1. Experiments for solving the earlier technical problems	37
IV.2. The morphogenesis of Peach Shoot tip and node cutting	52
IV.3. Changes in shoot tip and single node cutting contents of phenolic compounds as influenced by excising date from trees of three peach cultivars ..	106
V. SUMMARY AND CONCLUSION	109

V.1. Experiments aimed to investigate possibility of overcoming some technical problems	110
V.2. The morphogenesis of Peach Shoot tip and nodule cutting	113
V.3. Changes in phenolic compounds contents as influenced by excising date from three peach cultivars	122
VI. LITERATURE CITED	124
- Arabic Summary	132
