	Page
I- INTRODUCTION	1
II- REVIEW OF LITERATURE..	3
1- Effect of nitrogen on legumes growth and flowering.	3
2- Effect of nitrogen on other herbs and aromatic plants..	5
3- Effect of phosphorus on legumes growth and flowering	7
4- Effect of phosphorus on other herbs and aromatic plants..	8
5- Effect of N P K fertilization on legumes growth.	10
6- Effect of N P K fertilization on other herbs and aromatic plants..	10
7- Effect of Potassium on legumes growth and flowering	13
8- Effect of potassium on other herbs and aromatic plants	14
9- Effect of iron on growth and flowering...	15
10- Effect of iron on the herbs and aromatic plants..	19
III- MATERIALS AND METHODS	21
IV- RESULTS AND DISCUSSION	28
<u>The first experiment</u>	28
1) Fertilization experiment	28
A) FIELD EXPERIMENTS	28
I- Effect of different combinations of N P K Fe on the vegetative growth of Sweet peas	28
I-1- Plant height	28

	Page
I-2- Leaf area	29
I-3- Width of internode	35
I-4- Mean length of the internode	38
I-5- Leaf number per plant	41
I-6- Fresh weight of plant in gms	44
II- Effect of different combinations of N P K Fe on the flowering of Sweet peas	46
II-1- Earliness of flowering... ..	46
II-2- Yield of flowers per plant... ..	47
II-3- Peduncle length	52
III- Effect of different combinations of N P K Fe on the chemical composition of Sweet peas plant... ..	55
III-1- Leaves	55
a) Dry weight percentage	55
b) Nitrogen percentage	56
c) Phosphorus percentage	56
d) Potassium percentage	57
III-2- Chlorophyll content	59
III-3- Carbohydrate and sugar percentages	63
III-4- Stems	66
a) Dry weight percentage	66
b) Nitrogen percentage	66
c) Phosphorus percentage	67
d) Potassium percentage	67
III-5- Flowers	69
a) Dry weight percentage	69
b) Nitrogen percentage	69
c) Phosphorus percentage	70

d) Potassium percentage	70
e) Concrete yield	72

(B) POT EXPERIMENT

1) Vegetative growth	78
a- Plant height	78
b- Fresh weight of leaves per plant	79
c- Fresh weight of stem per plant	80
d- Length of roots	81
e- Fresh weight of roots	81
2- Flowering	82
a) Number of flowers per plant	82
b) Fresh weight of flowers per plant	82
3- Chemical composition of pot plant	84
a) Dry weight percentage	84
b) Nitrogen percentage	85
c) Phosphorus percentage	85
d) Potassium percentage	85
e) Iron in leaves content	86

Second experiment

I- Effect of different support materials on vegetative growth of Sweet peas	90
I-1- Plant height	90
I-2- Length of internode	91
I-3- Width of internode	91
I-4- Leaf area	91
I-5- Leaf dry weight	92
I-6- The weight of plant	92

	Page
II- Effect of different support materials on flowering.	94
II- a. Number of flowers per plant.	94
II- b. Fresh weight of flowers per plant in gms.	94
II- c. Dry weight percentage of flowers.	95
II- d. Flower peduncle length.	95
SUMMARY	97
LITERATURE CITED	104
