INTRODUCTION	1
OBJECT OF STUDY	4
REVIEW OF LITERATURE	5
1- General aspects of Guar Gum	5
2- Chemical Composition of Guar Seed	5
3- Guaran Solutions	7
4- Gels	12
5- Food Industrial uses	13
5.1. In processed cheese products	14
5.2. In bread and baked goods	14
5.3. In meat products	16
5.4. In Dressing and Sauces	18
5.5. In Beverages	18
6- Nutritive value	19
7- Human consumption of guar	21
MATERIALS AND METHODS	22
I- MATERIALS	22
1.1. Guar seeds	22
1.2. Chemical additives	22
1.3. Raw materials for processing	23
2- PREPARATION OF GUAR GUM	23
2.1. Hull removal	23
2.2. Germ removal	23
2.3. Endosperm grinding	23
2.4. Purification of the guar endosperm	23

3- CHEMICAL IDENTIFICATION OF GUAR GUM	25
3.1. Isolation of the polysaccharide	25
3.1.1 Isoaltion by using hot water	25
3.1.2 Isoaltion by using cold water	26
3.1.3 Isoaltion by using alkali aqueous treatment	26
3.1.4 Isolation by using acid treatment	26
3.2. Purifiaction of the guar polysaccharide	27
4.1. Technological Methods	29
4.1.1 The effect of type agitation on viscosity	29
4.1.2 The effect of temperature on viscosity	29
4.1.3 The effect oc concentration of guar gum on voscosity	30
4.1.4 The effect of pH on viscosity	30
4.1.5 The effect of adding sugar on viscosity	30
4.2. Technological Aspects	31
4.2.1 In Jams	31
4.2.1.1 100% sucrose	31
4.2.1.2 40% fructose + 60% sucrose	31
4.2.1.3 60% fructose + 40% sucrose	31
4.2.1.4 100% fructose	31
4.2.2 In Single Strength Juice	32
4.2.3 In Concentrated Juice	33
5- ANALYTICAL METHODS	34
5.1. Chemical Methods	34
5.1.1 Guar seed composition	34
5.1.1.1 Determination of moisture	34

5.1.1.2 Determination of ash	34
5.1.1.3 Determination of minerals	34
5.1.1.4 Determination of fat	34
5.1.1.5 Determination of total nitrogen and protein	34
5.1.1.6 Determination of amino acids	34
5.1.1.7 Determination of tryptophan	35
5.1.2 Determination of molecular weight	35
5.1.2.1 By intrinsic viscosity	35
5.1.2.2 By periodate oxidation	36
5.1.3 Hydrolysis of the polysaccharide, identification and qualitative and quantitative determination of the hydrolysis	37
5.1.4 Preliminary qualitative tests of the extracted polysaccharide	38
5.1.5 Guar solution and thickening agents	39
5.1.5.1 Determination of viscosity	39
5.1.5.2 pH value	39
5.1.5.3 Total soluble solids	39
5.1.5.4 Gel strength	40
5.1.5.5 Cloud stability	40
5.2. Organoleptic Evaluation	40
<b>RESULTS AND DISCUSSION</b>	41
General composition of guar seeds	41
Amino acid identification	46

CHEMICAL IDENTIFICATION OF GUAR GUM	53
Isolation process	53
Determination of molecular weight	56
By intrinsic viscosity	56
By periodate oxidation	60
Acid hydrolysis of polysaccharide and identification of the hydrolyate	66
TECHNOLOGICAL PROPERTIES	70
.3.1 The effect of type agitation on viscosity	75
.3.2 The effect of concentration on viscosity	76
.3.3 The effect pH on viscosity	81
.3.4 The effect of temperature on viscosity	86
.3.5 The effect of addition sucrose on viscosity	91
INDUSTRIAL APPLICATION	97
In Jams	97
In Juices	123
SUMMARY	159
REFERENCES	167
