I. INTRODUCTION	1
II. REVIEW OF LITERATURE	3
1. Gene action	3
2. Effect of nitrogen fertilizer	17
III. MATERIALS AND METHODS	29
Statistical analysis:	31
Genetical analysis:	33
1. Heterosis:	33
2. General and specific combining ability estimates:	36
Second study:	40
Statistical analysis:	41
IV. RESULTS AND DISCUSSION	41
1. First experiment:	41
1.1. Yield, yield components and some agronomic attributes:	41
1.1.1. Analysis of variance, means and heterosis:	49
1.1.2. Heterosis:	55
1.1.3. Combining ability	58
General combining ability effects	62
Specific combining ability effects (S_{ij})	67
1.2. Quality characters	67
1.2.1. Analysis of variance, means and heterosis	71
1.2.2. Heterosis	74
1.2.3. Combining ability	77
General combining ability effects	80
Specific combining ability effects (S_{ij})	82
2. The second experiment	82
2.1. Growth, yield and its components	82
2.1.1. Effect of seasons	82
2.1.2. Varietal differences	89
2.1.3. Effect of nitrogen fertilization	94
2.1.4. Effect of the interaction between varieties and nitrogen fertilizer levels	97
2.2. Chemical contents	97
2.2.1. Varietal differences	98
2.2.2. Effect of nitrogen fertilization	99
2.2.3. Effect of the interaction between varieties and nitrogen fertilizer levels	101
V. SUMMARY	101
VI. REFERENCES	108
ARABIC SUMMARY	108
