INTRODUCTION	1
2 REVIEW OF LITERATURE.....	4
2.1 Variance components for growth traits.....	4
2.1.1 Direct inversion of coefficient matrix for estimation of variance components.....	4
2.1.2 Iterative methods (and convergence rate) for estimation of variance components.....	6
2.1.3 Cholesky transformation.....	7
2.1.4 Criteria to compare variance components.....	8
2.1.5 Factors related to variance components.....	9
2.1.5.1 Age of chick and variance components.....	9
2.1.5.2 Breeds and variance components.....	9
2.1.5.3 Sire or Dam Variance Components.....	13
2.1.5.4 Common environmental variance.....	14
2.1.5.5 Number of records used and data structure.....	17
2.2 Heritability estimates for growth traits.....	18
2.2.1 Genetic constitution of breeds.....	18
2.2.2 Selection, if practiced.....	32
2.2.3 Number of records used and data structure.....	32
2.2.4 Models applied for analysis of the data.....	34
2.2.5 Relationship coefficient matrix in the parent population.....	36
2.2.6 Genetic models for estimation.....	37
2.2.6.1 Sire model.....	37
2.2.6.3 Dam model.....	37
2.2.6.4 Animal model.....	38
2.3 Correlations among growth traits.....	40
2.3.1 Genetic correlation.....	41
2.3.2 Environmental correlation.....	52
2.3.3 Phenotypic correlation.....	52
2.4 Evaluation of animals.....	53
2.4.1 Mixed-model methodologies for evaluation of animals.....	54

2.4.2 BLUP as estimators for evaluation.....	54
2.4.3 Animal model methodologies for evaluation of animals.....	56
2.4.3.1 Definition.....	56
2.4.3.2 Information required.....	57
2.4.3.3 Biasness and precision.....	58
2.4.3.4 Single-trait vs multi-variate animal models.....	59
2.4.3.5 Selection index vs multivariate BLUP.....	60
2.4.3.6 Limitations of the animal model.....	61
2.4.4 Accuracy of evaluation.....	62
2.4.5 Estimates of transmitting abilities (TA) in poultry.....	63
2.4.6 Rank correlation.....	64
 3 MATERIAL AND METHODS.....	 65
3.1 Breed used.....	65
3.2 Breeding plan and management.....	65
3.3 Data and statistical analysis.....	66
3.3.1 Analysis of data.....	68
3.3.1.1 Models.....	68
3.3.1.1.1 Sire and dam models.....	68
(i) In case of the sire model.....	69
(ii) In case of the dam model.....	70
3.3.1.1.2 Animal model.....	71
(i) Single-trait animal model.....	71
(ii) Multi-trait animal model.....	73
3.4 ESTIMATION OF VARIANCE COMPONENTS.....	76
3.4.1 REML method for sire or dam models.....	76
3.4.2 MTDFREML method for animal model.....	77
3.4.2.1 Theory.....	77
3.4.2.2 Expectation of MTDFREML estimates.....	78
3.5 Estimation of heritability.....	82
3.5.1 From the sire model.....	82
3.5.2 From the dam model.....	82
3.5.3 From the animal model.....	82
3.6 Estimation of correlations.....	83
3.7 Estimation of transmitting ability.....	84
3.8 Estimation of rank correlation.....	85
 4 RESULTS AND DISCUSSION.....	 87

4.1 MEANS AND VARIATIONS	87
4.1.1 Means.....	87
4.1.2 Percentage of variability (V%).....	87
4.2 NON-GENETIC ASPECTS	89
4.2.1 Generation.....	89
4.2.2 Sex.....	92
4.3 COMPONENTS OF VARIANCE	92
4.3.1 REML method.....	92
4.3.1.1 REML estimators from the sire model.....	94
4.3.1.2 REML estimators from the dam model.....	94
4.3.2 DFREML estimators from single-trait and multi-traits animal models..	96
4.3.2.1 Direct additive genetic variance.....	96
4.3.2.2 Common environmental variance.....	101
4.4 HERITABILITY	102
4.4.1 Heritabilities estimated from the sire model.....	103
4.4.2 Heritabilities estimated from the dam model.....	106
4.4.3 Heritabilities estimated from single-trait and multi-traits animal models	107
4.5 CORRELATIONS AMONG GROWTH TRAITS	109
4.5.1 Genetic correlation (r_G).....	110
4.5.2 Common environmental correlation (r_C).....	114
4.5.3 Environmental correlation (r_E).....	114
4.5.4 Phenotypic correlation (r_P).....	115
4.6 EVALUATION OF BIRDS	116
4.6.1 Computational aspects.....	116
4.6.2 Breeding values estimated for birds with records.....	120
4.6.3 Transmitting abilities estimated for birds without records.....	124
4.6.3.1 Transmitting ability estimates for sires of birds.....	124
4.6.3.2 Transmitting ability estimates for dams of birds.....	126
4.6.4 Rates of change in accuracy.....	129
4.6.5 Rank correlation.....	132
4.6.5.1 Rank correlations among estimators predicted by single-trait animal models.....	132
4.6.5.2 Rank correlations among estimators predicted by single-trait vs multi-traits animal models.....	136

5 CONCLUSION.....	138
6 SUMMARY.....	140
7 REFFERENCES.....	144
8 ARABIC SUMMARY.....
