

CONTENTS

1-INTRODUCTION.....	1
2-REVIEW OF LITERATURE.....	3
2-1.Effect of phosphorus fertilizer level on growth, yield and quality of common bean.....	3
2-2.Effect of phosphorus fertilizer source on growth, yield and quality of common. Bean.....	20
2-3. Effect of level within source of phosphorus fertilizer on growth, yield and quality of common bean.....	23
2-4. Effect of time and frequency of P-application on growth, yield and quality of common bean.....	28
3-MATERIALS AND METHODS	
3-1. <u>First Experiment:</u> Effect of phosphorus source and level on growth, dry seed yield and its quality of common bean.....	31
3-2. <u>Second Experiment:</u> Effect of time and frequency of phosphorus fertilizer on growth, dry seed yield and its quality of common bean.....	34
3-3. <u>Experimental procedures</u>	35
3-4. <u>Statistical analysis</u>	36

4. RESULTES AND DISCUSSION

4-1. First Experiment: Effect of phosphorus level and source

on.....38

1-1. Vegetative growth characteristics.....38

1-2. Chlorophyll content.....49

1-3. Dry seed yield and its components.....52

1-4. Chemical constituents.....65

4-2 Second Experiment: Effect of time and frequency of P-

application on :

2-1. Vegetative growth characteristics.....78

2-2. Dry seed yield and its component.....83

5.SUMMARY AND CONCLUSTION.....97

6.REFERANCES.....110

7.ARABIC SUMMARY.....
