I	INTRODUCTION	1
II	REVIEW OF LITERATURE	3
2.1	Sire or Dam variance components for growth traits.....	3
2.1.1	Variability between breeds.....	3
2.1.2	Paternal and maternal additive genetic variance.....	7
2.1.3	Age of rabbit:.....	7
2.1.4	Henderson's method vs. REML.....	8
2.1.5	Data Structure.....	8
2.1.6	Inbreeding.....	9
2.2	Heritability.....	9
2.2.1	Genetic constitution of breeds	16
2.2.2	Selection.....	16
2.2.3	Data structure and experimental design.....	16
2.2.4	Rabbit's age.....	17
2.2.5	Sire and dam heritabilities.....	18
2.2.6	Methods of estimation.....	18
2.2.7	Relationship coefficient matrix in the parent population.....	19
2.2.8	Models of Analysis.....	20
2.2.9	Accuracy of different methods and models.....	21
2.3	Genetic Evaluation.....	22
2.3.1	Assumptions.....	22
2.3.2	Mixed Model Methodology.....	22
2.3.3	Animal Model (AM) Methodology.....	23
2.3.3.1	Properties and accuracy.....	23
2.3.3.2	Limitations and overcomes on using an animal model	25
2.3.3.3	Reliability and predicted error variance (PEV).....	26
2.3.4	Estimates of Sire Transmitting Ability (STA).....	28
2.3.5	Estimates of Dam Transmitting Ability (DTA).....	30
III.	MATERIAL AND METHODS.....	31
3.1	Animals and Breeding Plan.....	31
3.2	Rabbitry and Management.....	31
3.3	Data.....	32
3.4	Statistical Analysis.....	33
3.4.1	Models of analysis.....	33
3.4.2	Estimation of variance components using Henderson's method.....	34

	<u>Page No.</u>
3.4.2.1 Sire Model.....	35
3.4.2.2 Dam Model.....	36
3.4.3 Estimation of variance components using REML method.....	38
3.4.4 Estimation of Heritability.....	38
3.4.5 Prediction of sire and dam transmitting abilities.....	39
3.4.5.1 Transmitting abilities (TA) estimated using Sire and dam models	39
3.4.5.2 Transmitting abilities (TA) estimated using an Animal Model...	41
IV RESULTS AND DISCUSSION.....	43
4.1 Means of uncorrected records.....	43
4.2 Variations of uncorrected records.....	45
4.3 ANOVA and tests of significance.....	46
4.4 Random Components of variance.....	49
4.4.1 Sire Model.....	49
4.4.2 Dam Model.....	53
4.5 Sire heritabilities.....	56
4.5.1 Genetic constitution of breeds.....	58
4.5.2 Henderson's method vs. REML method.....	58
4.5.3 Data structure and available number of progeny used.....	61
4.6 Dam heritabilities.....	61
4.6.1 Genetic constitution of breeds.....	62
4.6.2 Henderson's method vs. REML procedure.....	64
4.6.3 Sires vs dams heritabilities.....	65
4.7 Sire Transmitting Abilities (STA).....	66
4.7.1 Transmitting abilities for Sires (animals with records).....	68
4.7.2 Transmitting abilities for animals without records (Dams of Sires).....	75
4.8 Dam Transmitting Abilities (DTA).....	75
4.8.1 Transmitting abilities for dams (animals with records).....	78
4.8.2 Transmitting abilities for animals without records.....	82
(i) Transmitting abilities for sires of dams.....	82
(ii) Transmitting abilities for dams of dams.....	84
V. CONCLUSION.....	86
VI. SUMMARY.....	88
VII. REFERENCES.....	93
APPENDICES.....	
ARABIC SUMMARY.....
