

## C O N T E N T S

Page

I. INTRODUCTION .....	
II. REVIEW OF LITERATURE .....	
III. MATERIAL AND METHODS .....	
IV. RESULTS AND DISCUSSION .....	
IV.1. <u>First Experiment</u> : Interactive effects of P and K fertilization on growth, chemical composition, flowering, fruit yield and quality of okra.	
1.1. Plant growth characteristics .....	
1.2. Chemical composition of plant foliages ....	
1.3. Flowering characteristics .....	
1.4. Fruit yield and its components .....	
1.5. Fruit chemical composition .....	
IV.2. <u>Second Experiment</u> : Interactive effects of cultivar and planting date on growth, chemical composition, flowering, fruit yield and quality of okra .....	
2.1. Plant growth characteristics .....	
2.2. Chemical composition of plant foliage ....	
2.3. Flowering characteristics .....	
2.4. Fruit yield and its components .....	
2.5. Fruit chemical composition .....	
IV.3. <u>Third Experiment</u> : Interactive effects of soil salinity and variety on growth, chemical composition, flowering and fruit yield of okra .	
3.1. Vegetative growth characteristics .....	
3.2. Chemical composition of plant foliage ....	
3.2.a. Chlorophyll a, b and carotene .....	
3.2.b. Polyphenol oxidase and peroxidase activity .....	
3.2.c. N, P, K and total carbohydrates .....	
3.3. Flowering characteristics .....	
3.4. Fruit yield and its components .....	

	Page
<u>IV.4. Fourth Experiment: Interactive effects of</u> soil salinity and growth regulators on growth, chemical composition, flowering, and fruit yield of okra .....	
4.1. Vegetative growth characteristics .....	
4.2. Chemical composition of plant foliage ...	
4.2.a. Chlorophyll a, b, and carotene .....	
4.2.b. Polyphenol oxidase and peroxidase activity .....	
4.2.c. N, P, K and total carbohydrates .....	
4.3. Flowering characteristics .....	
4.4. Fruit yield and its components .....	
V. SUMMARY AND CONCLUSION .....	
VI. LITERATURE CITED .....	
ARABIC SUMMARY
