INTRODUCTION.	1
REVIEW OF LITERATURE.	3
MATERIALS AND METHODS.	30
RESULTS AND DISCUSSION.	40
FIRST EXPERIMENT:	40
The effect of seed sowing date, variety and spacing between plants on plant growth and its chemical constituents as well as yield and quality of green pods of pea plants.	
1- Plant growth characteristics.	40
2- Chemical composition of plant foliage`	45
A- Photosynthetic pigments	45
B- Macroelements (N, P and K) content	49
3- Green pod yield and its component	54
4- Physical pod characteristics	60
5- Chemical constituents of seeds	64
SECOND EXPERIMENT:	67
Effect of pea plants fertilization level on green pods yield and storageability,as well as,effect of disinfection and packing treatments and storage period and conditions on keeping quality of pea pods.	
1- Green pods yield	68
2- Weight loss percentage	69
3- The decay percentage	76
4- Seed dry matter percentage	83
5- Total soluble solids percentage	89
6- The sugars percentage	95
SUMMARY AND CONCLUSION	105
