1 INTRODUCTION	1-2.
2 REVIEW OF LITERATURE	3
2.1. Response of maize plant growth, yield and yield components to mineral and bio N-fertilization	3
2.1.1. Response of maize plant growth, yield and yield components to mineral nitrogen fertilization	3
2.1.2. Response of maize plant growth, yield and yield components to Cerealin biofertilizer of <i>Azospirillum brasilense</i> inoculum.	9
2.1.3. Response of maize plant growth, yield and yield components to Rhizobacterin biofertilizer of a mixture of <i>Azospirillum lipoferum</i> and <i>Azotobacter chroococcum</i> inocula..	15
2.2. Effect of mineral and bio-N fertilization on soil microbiological activity and N content.	22
2.2.1. Effect of mineral nitrogen on soil microbiological activity and N contents.	22
2.2.2. Effect of biological nitrogen on soil microbiological activity and N conten.	24
3 MATERIALS AND METHODS	27
3.1. Soil of experimental sites	27
3.2. Experimental design	27
3.3. Experimental treatments.	29
3.3.1. Maize cultivars (main plots)	29
3.3.2. Mineral N-fertilization rates (sub-plots)	29
3.3.3. Bio-N fertilization (sub-sub-plots)	30
3.4. Planting experimental field.	31
3.5. Plant sampling	32
3.6. Soil sampling	33
3.7. Plant and soil analyses	33
3.7.1. Plant analysis	33
3.7.2. Soil analysis	34
3.8. Statistical analysis	36
4 RESULTS AND DISCUSSION	37
4.1. Dry weight and N, P and K-uptake by maize plants at 50 and 70 days after sowing (DAS) as affected by maize cultivars, N-levels and biofertilizers:	37
4.1.1. Effect of maize cultivars on dry weight and N, P and K uptake by maize plants at 50 and 70 DAS.	37
4.1.2. Effect of mineral N-level on dry weight and N, P and K-uptake by maize plants at 50 and 70 DAS.	38
4.1.3. Dry weight and N, P and K-uptake by maize plants at 50 and 70 DAS as affected by seed inoculation with biofertilizers:	41
4.1.1.1. Effect of interaction of treatments on dry weight and N, P and K-uptake by maize plants at 50 and 70 DAS..	43

CONTENTS

	Page
4.1.1.2 Dry weight and N, P and K-uptake by maize plants as affected by maize cultivar x N-level interaction.	43
4.1.1.3. Dry weight and N, P and K uptake by maize plants as affected by maize cultivar x biofertilizer interaction.	45
4.1.1.4. Dry weight and N, P and K uptake by maize plants as affected by N-level x biofertilizer interaction.	47
4.1.1.5. Dry weight and N, P and K-uptake by maize plants as affected by maize cultivar x N-level x biofertilizer interaction.	49
4.2. N, P and K-concentration in ear leaf of maize cultivars at 50% silking as affected by maize cultivar, N-level, biofertilizer.	51
4.2.1. N, P and K concentration in ear leaf of maize cultivars at 50% silking as affected by maize cultivars.	51
4.2.2. Effect of N-level on N,P and K concentration in ear leaf of maize cultivars at 50% silking.	54
4.2.3. Effect of biofertilizer on N, P and K concentration in ear leaf of maize cultivars at 50% silking.	54
4.2.1.1. N, P and K concentration in ear leaf as affected by interaction of experimental treatments.	55
4.2.1.2. Effect of the interaction of maize cultivar x N-level on N, P and K concentration in ear leaf at 50% silking.	55
4.2.1.3. Effect of maize cultivar x biofertilizer interaction on N, P and K concentration in ear leaf.	55
4.2.1.4. Effect of the interaction of N-level x biofertilizer on N, P and K concentration in ear leaf at 50% silking.	55
4.2.1.5. Effect of maize cultivar x N-level x biofertilizer interaction on N, P and K concentration in ear leaf at 50% silking.	57
4.3. Effect of maize cultivars, N-levels, biofertilizers on maize yield and its components.	59
4.3.1. Effect of maize cultivars on maize yield and its components.	59
4.3.2. Effect of N-levels on yield of maize and its components.	59
4.3.3. Effect of maize seed inoculation with Cerealin and Rhizobacterin on maize yield and its components.	62
4.3.1.1. Effect of the interaction of the involved treatments on maize yield and its components.	63
4.3.1.2. Effect of maize cultivar x N-level interaction on maize yield and its components.	63
4.3.1.3. Effect of maize cultivar x biofertilizer interaction on maize yield and its components.	63
4.3.1.4. Effect of N-level x biofertilizer interaction on maize yield and its components.	65
4.3.1.5. Response of maize yield and its components to interaction of maize cultivar x N-level x biofertilizer.	65
4.4. Effect of maize cultivars, N-levels and biofertilizers on grain content of N, P and K.	67
4.4.1. Effect of maize cultivars on N, P and K content in grains.	67
4.4.2. Response of N, P and K content in grains to mineral N-levels .	70
4.4.3. Response of N, P and K content in grains to seed inoculation with biofertilizers. .	70

Contents

	Page
4.4.1.1. Effect of interaction of the involved treatments on N,P and K content in grains.	71
4.4.1.2. Response of N, P and K content in grains to interaction of maize cultivar x N-level.	71
4.4.1.3. Response of N, P and K content in grains to maize cultivar x biofertilizer.	71
4.4.1.4. Response of N, P and K content in grains to interaction of N-level x biofertilizer..	73
4.4.1.5. Response of N, P and K content in grains to interaction of maize cultivar x N-level x biofertilizer..	73
4.5. Effect of maize cultivars, N-levels and biofertilizers on soil concentration of NH_4^+ and NO_3^- .	75
4.5.1. Effect of maize cultivars on soil concentration of NH_4^+ and NO_3^- .	75
4.5.2. Effect of mineral N-levels on soil concentration of NH_4^+ and NO_3^- .	75
4.5.3. Effect of biofertilizers on soil concentration of NH_4^+ and NO_3^- .	80
4.5.1.1. Effect of interaction of the involved treatments on soil concentration of NH_4^+ and NO_3^- .	81
4.5.1.2. Effect of maize cultivar x N-level interaction on soil concentration of NH_4^+ and NO_3^- .	81
4.5.1.3. Effect of maize cultivar x biofertilizer interaction on soil concentration of NH_4^+ and NO_3^- .	81
4.5.1.4. Effect of maize N-level x biofertilizer interaction on soil concentration of NH_4^+ and NO_3^- .	84
4.5.1.5. Effect of maize cultivar x N-level x biofertilizer interaction on soil concentration of NH_4^+ and NO_3^- .	86
4.6. Effect of maize cultivars, N-levels and biofertilizers on soil microbiological activity.	89
4.6.1. Effect of maize cultivars on soil microbiological activity.	89
4.6.2. Effect of N-levels on soil microbiological activity.	92
4.6.3. Effect of Cerealin and Rhizobacterin biofertilizers on soil microbiological activity.	93
4.6.1.1. Effect of interaction of the involved treatments on soil microbiological activity.	94
4.6.1.2. Effect of maize cultivar x N-level interaction on soil microbiological activity.	94
4.6.1.3. Effect of maize cultivar x biofertilizer interaction on soil microbiological activity.	94
4.6.1.4. Effect of N-level x biofertilizer interaction on soil microbiological activity.	97
4.6.1.5. Effect of maize cultivar x N-level x biofertilizer interaction on soil microbiological activity.	97
4.7. CONCLUSION.	102
