

CONTENTS

	PP
1- INTROUDUCTION	1
2- REVIEW OF LITERATURE	2
2.1- Effect of phosphorus levels on growth, yield and quality of cauliflower.....	2
2.2- Effect of phosphorus source on growth, yield and quality of cauliflower	11
2.3- Effect of time of P-application on growth, yield and quality of cauliflower	14
2.4- Effect of micronutrints; Mn, Zn and B application on growth yield and quality of cauliflower.	
3- MATERIALS AND METHODS.	26
3.1- First Experiment: Effect of phosphorus level and source on growth, yield, quality and seed production of cauliflower	26
3.2- Second Experiment: Effect of time and source of phosphorus application on growth, yield, quality and chemical composition of cauliflower	28
3.3- Third Experiment : Effect of some micronutrients application on growth, yield, and quality of cauliflower curds.....	30
3.4- Experimental procedures	31
3.5- Experimental design and statistical analysis	35
4- RESULTS AND DISCUSSION:	36
4.1- First Experiment: Effect of level and source P-application on:	
1.1- Vegetative growth.....	36
1.2- Chlorophyll content	40
1.3- Early yield	43
1.4- Marketable yield	49
1.5- Total yield	43
1.6- Yield components.....	57
