

Content

1. Introduction	1
2.REVIEW OF LITERATURE	3
2.1.Classification of irrigation water	3
2.2.Water quality assessment	6
2.3.Classification of salt effected soils	8
2.3.1. Nonsodic- saline soils.....	8
2.3.2. Non-saline sodic soils.....	11
2.3.3. Saline sodic soils.....	12
2.4. Irrigation water in relation to soil salinity	13
2.5. Leaching of soluble salts out of the soil profile	15
2.5.1. Mechanism of salt removal by leaching.....	15
2.5.2.Contiuous and intermittent leaching.....	16
2.5.2.1. Continuous leaching.....	16
2.5.2.2. Intermittent leaching.....	16
2.5.3.The leaching requirement (LR).....	17
2.6. Effect of water salinity on chemical composition and redistribution of soluble salts in soil	19
2.7. Effect of water quality on germination of seeds and plant growth	23
2.7.1. Germination of seeds.....	23
2.7.2. Plant growth.....	26
2.8. Effect of water quality on chemical composition of plants	30
2.8.1. Nitrogen concentration and uptake by plants.....	30

4.2. Soluble salts redistribution in soils under intermittent leaching using normal and magnetized waters.....	76
4.2.1.Soluble anions.....	81
4.2.2. Soluble cations.....	92
4.2.3. Effect of intermittent leaching of the investigated soils on their SAR and ESP values.....	102
4.3. Effect of magnetization of different water qualities on germination percentage and rate of wheat seeds.....	108
4.4.Effect of magnetized irrigation waters on dry weight (g pot⁻¹) of wheat plants grown on the studied soils and their uptake and concentration of N, P and K.....	111
4.4.1.Effect on N, P and K uptake	111
4.4.2.Effect on N, P and K concentration.....	113
4.5.Chemical analysis of the studied soils after removal of wheat plants.....	117
4.5.1.The pH value.....	117
4.5.2.The EC value.....	118
4.5.3. <i>Ionic composition</i>	118
4.5.3.1. <i>Soluble anions</i>	118
4.5.3.2.Soluble cations.....	121
5. SUMMARY AND CONCLUSION.....	123
6. REFERENCES.....	134
7. ARABIC SUMMARY.....
