1. INTRODUCTION	1
2. REVIEW OF LITERATURES	5
I. Effect of planting media	5
I.1. On vegetative growth	5
I.2. On chemical composition	18
II. Effect of chemical fertilization	22
II.1. On vegetative growth	22
II.2. On chemical Composition	36
II.3. Oil determinations	42
III. Effect of biofertilizer	46
III.1. On vegetative growth	46
III.2. On Chemical Composition	48
III.3. Oil Determination	50
3. MATERIAL AND METHODS	55
Preparation of the differential substrate mixtures (planting media)	55
II- The second part: Effect of chemical and bio – fertilizers on <i>Adiantum cuneatum</i> plants	57
Bio-fertilizer treatments	58
Chemical fertilizer treatments	58
Data recorded	59
Statistical analysis	61

Subject	Page
4. RESULTS and DISCUSSION	62
Part (1):Effect of some planting media on <i>Adiantum cuneatum</i> plants	62
A- On vegetative growth	62
B- Root growth measurements	70
C- Effect on the chemical composition	73
D-Leaves oil percentage	84
Part II: Effect of bio and chemical fertilizer on growth and chemical composition of <i>Adiantum cuneatum</i> plants	86
A- Effect on vegetative growth parameters	86
B-Root growth measurements	94
C- On chemical composition measurements	97
1-Effect of chemical fertilization	108
2-Effect of bio-fertilization	111
A- N-fixing bacteria	111
B- Phosphate dissolving bacteria	111
D-Leaves oil percentage	112
5. SUMMARY	115
6. REFERENCES	124
