INTRODUCTION	1
REVIEW OF LITERATURE	3
Yeast strains used in single cell protein production	3
Raw materials used for production of single cell protein	4
Molasses	5
Pretreatment of molasses	6
Cellulosic and starchy wastes	7
Hydrolysis of cellulosic wastes	8
Whey	10
Factors affecting production of single cell protein	11
Nutritional factors	11
Media contents	12
Effect of carbon sources	13
Effect of nitrogen sources	14
Environmental factors	16
Aeration and agitation	16
Effect of pH	19
Effect of temperature and incubation period	20
Nutritive value of yeast protein	22
Nucleic acids content and treatments for reducing it:	25
Effect of gamma radiation	29
MATERIALS AND METHODS	31
Microorganisms used :	35
Sources of raw materials	36
Media used:	37
Methods:	40
Yeast propagation	40
1- Standard inoculum	40
2- Growth of yeast strains in shake flasks	41
3- Growth of yeast strains in the fermentor	41

	PAGE
4- Heat shock treatment	43
Clarification of molasses	43
Hydrolysis of rice husks	43
Chemical determinations	44
Determination of cell dry weight	44
Determination of reducing and non-reducing sugars	44
Determination of total carbohydrates	46
Determination of total nitrogen	47
Determination of moisture	47
Determination of ash content	47
Determination of pH values	48
Determination of phosphorus	48
Determination of calcium and magnesium	48
Determination of sodium and potassium	49
Determination of iron, copper, manganese and zinc	49
Nucleic acids determination	50
Amino acids determination	50
Effect of gamma radiation	51
Calculations	52
 RESULTS AND DISCUSSION	 54
Screening of yeast strains	54
Effect of semi-synthetic medium	63
Effect of some nutritional factors	66
Effect of carbon sources	66
Effect of glucose concentrations	69
Effect of natural carbon sources	72
Effect of nitrogen sources	75
Effect of corn steep liquor concentrations	78
Effect of some environmental factors	81
Effect of pH	81
Effect of temperature	84
Effect of inoculum size	85
Effect of incubation period	88
Effect of shaking rate	94
Factors affecting biomass production using a fermentor:	97
Effect of aeration rate	97
Effect of incubation period at optimal conditions	102

	PAGE
Chemical composition of biomass	106
Amino acids content	107
Effect of heat shock treatment on the reducing of nucleic acid content	113
Effect of gamma radiation	121
SUMMARY	127
REFERENCES	133
ARABIC SUMMARY
