

CONTENTS

	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2.1 Quality of water	3
2.1.1 Water salinity	3
2.1.1.1 Total soluble salts	3
2.1.2 Specific ions content	6
2.1.3 Amount of applied irrigation water	9
2.1.4 Trace elements content	10
2.1.4.1 Trace elements content in Nile water	10
2.1.4.2 Trace elements content in low quality water	12
2.2 Soil properties as affected by irrigation water quality	14
2.2.1 Soil physical properties	14
2.2.1.1 Soil aggregation	14
2.2.1.2 Moisture characteristics	16
2.2.2 Soil chemical properties	17
2.2.2.1 Soil pH	17
2.2.2.2 Soil salinity	20
2.2.2.3 Soil organic matter	24
2.2.2.4 Calcium carbonate content	26
2.2.2.5 Exchangeable cations and cation exchange capacity	28
2.2.2.6 Macro-elements content (NPK)	31
2.2.2.7 Micro-elements content	36
2.2.3 Soil mineralogical properties as affected by soil environmental conditions	47
2.3 Plant growth and elements content as affected by water quality	52
2.3.1 Plant growth	52
2.3.2 Macro-elements content (NPK)	56
2.3.3 Micro-elements content (Fe, Zn, Mn, Cu)	61
2.3.4 Boron contents	65
3. MATERIALS AND METHODS	67
3.1 Sampling	68
3.1.1 Soil sampling	68

	Page
3.1.2 Water sampling	69
3.1.3 Plant sampling	69
3.2 Experimental procedures	71
3.2.1 Physical properties	71
3.2.2 Chemical properties	72
3.3 Mineralogical analysis	73
3.3.1 Segregation of clays	73
3.3.2 Mineralogical analysis of the clay fraction	73
3.3.2.1 X - ray	73
3.3.2.2 Elemental analysis	74
3.3.2.3 Specific surface area and charge density	74
3.4 Water analysis	74
3.5 Plant analysis and related measurements	75
4. RESULTS AND DISCUSSION	76
4.1 Morphological description of the studied sites	76
4.2 Quality of applied irrigation water	99
4.2.1 Water chemical analysis	99
4.2.1.1 Water of Helwan site	99
4.2.1.2 Water of El-Gabal El-Asfar site	105
4.2.1.3 Water of Belbies site	109
4.2.1.4 Water of Idko site	110
4.2.2 Trace elements content in the applied irrigation water	112
4.2.3 Evaluation of water suitability for irrigation	116
4.3 Soil properties as affected by irrigation water quality	119
4.3.1 Helwan experimental site	119
4.3.1.1 Soil physical properties	119
4.3.1.2 Soil chemical properties	130
4.3.1.3 Clay mineralogy as affected by water quality	157
4.3.1.4 Plant growth and elements content as affected by irrigation water quality	169
4.3.2 El-Gabal El-Asfar experimental site	180
4.3.2.1 Soil physical properties	180
4.3.2.2 Soil chemical properties	194
4.3.2.3 Clay mineralogy as affected by water quality	220
4.3.2.4 Plant growth and elements content as affected by irrigation water quality	229

	Page
4.3.3 Belbies experimental site	235
4.3.3.1 Soil physical properties	235
4.3.3.2 Soil chemical properties	247
4.3.3.3 Clay mineralogy as affected by water quality	269
4.3.3.4 Plant growth and elements content as affected by irrigation water quality	278
4.3.4 Idko experimental site	284
4.3.4.1 Soil physical properties	284
4.3.4.2 Soil chemical properties	296
4.3.4.3 Clay mineralogy as affected by water quality	318
4.3.4.4 Plant growth and elements content as affected by irrigation water quality	328
5. CONCLUSION	334
6. SUMMARY	343
7. REFERENCES	354
8. ARABIC SUMMARY
