Introduction	1
Review of literature	4
* Effect of calcium on <u>Azolla</u> growth behaviour	4
* Effect of some heavy metals on <u>Azolla</u> plant growth	9
* Physiological responses of <u>Azolla</u> plant to the presence of some heavy toxic non-essential elements	14
Material and Methods	18
Results and Discussions	26
* <u>Experiment I</u>	26
Effect of variable calcium levels on the growth of <u>Azolla</u> plants which pre-subjected to EDTA for two or four hours.	26
1- Effects of different treatments on the growth behaviour of <u>Azolla</u> plants.....	29
a) Biomass fresh weight per vessel	29
b) Biomass dry weight per vessel	31
c) Frond fragmentations.....	32
d) Average fresh weight per one frond	35
e) Average dry weight:per one frond....	36
f) Average root number per one frond...	38
g) Average root length	39
h) Average of total root number and their total length per vessel.....	42
2- Total sugars contents:	48
a) Sugars concentration	48
b) Total sugars content of biomass per vessel	50
c) Total sugars per one frond	52

- II -

	Page
3- Nitrogen contents :	55
a) Nitrogen concentrations	55
b) Total nitrogen content of the biomass per vessel	56
c) Total nitrogen per one frond	58
4) Phosphorus contents:-	61
a) Phosphorus concentrations	61
b) Total phosphorus content of the biomass per vessel	63
c) Total phosphorus per one frond.....	64
5) Potassium contents	67
a) Potassium concentration	67
b) Total potassium content of the biomass per vessel	68
c) Total potassium content per one frond	69
6) Calcium contents	72
a) Calcium concentrations	72
b) Total calcium content of the biomass per vessel	73
c) Total calcium content per one frond	74
7) Magnesium contents	76
a) Magnesium concentrations.....	76
b) Magnesium content of the biomass per vessel	77
c) Total magnesium content per one frond	78

8- Relative proportion percent between N, P, K, Ca and Mg in <u>Azolla</u> biomass.....	80
<u>Experiment II</u> :	83
<u>Azolla</u> plant growth behaviour as affected by Cadmium (Cd), Lead (Pb) and Murcury (Hg) with the presence of variable calcium levels in the growing media.	83
1- Effect of different treatments on the growth behaviour of <u>Azolla</u> plants.....	88
a) Biomass fresh weight per vessel ...	88
b) Biomass dry weight per vessel	91
c) Number of fronds per vessel	93
d) Fresh weight per one frond	96
e) Dry weight per one frond	99
2- Total sugars contents	101
a) Sugars concentration	101
b) Total sugars in <u>Azolla</u> biomass per vessel	103
c) Total sugars content per one frond	105
3- Nitrogen contents	108
a) Nitrogen concentration	108
b) Total nitrogen accumulation in <u>Azolla</u> biomass per vessel	110
c) Total nitrogen content per one frond	113
4- Phosphorus contents	115
a) Phosphorus concentration	115
