

CONTENTS	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2. 1. Total copper in soils.....	3
2. 2. Available copper in soils.....	3
2. 3. Fractionation and adsorption of copper in soils....	5
2. 4. Release (desorption) of copper from soils.....	6
2. 5. Factors affecting copper availability.....	7
2. 5. 1. Organic matter.....	7
2. 5. 2. Soil pH.....	10
2. 5. 3. Calcium carbonate content.....	15
2. 5. 4. Soil texture.....	16
3. MATERIALS AND METHODS	18
3.1. Experimental work.....	18
3.2. Methods analysis	20
3.3. Equations describing copper sorption and their Calculation	21
3.3.1. Langmuir equation	21
3.3.2. Freundlich equation.....	22
3.3.3. Temkin equation	23
4. RESULTS AND DISCUSSION	24
4. 1. Effect of pH on copper adsorption isotherm parameters.....	23
4. 1. 1. Adsorption of copper on soils.....	23
4. 1. 1. 1. Application of Langmuir equation.....	27
4. 1. 1. 2. Application of Freundlich equation.....	36
4. 1. 1. 3. Application of Temkin equation.....	42
4. 1. 2. Adsorption of copper by clay minerals.....	42
4. 1. 2. 1. Application of Langmuir equation.....	50

CONTENTS	Page
4. 1. 2. 2. Application of Freundlich equation.....	54
4. 1. 2. 3. Application of Temkin equation.....	61
4. 1. 3. Adsorption of copper on humic acid.....	68
4. 1. 3. 1. Application of Langmuir equation.....	68
4. 1. 3. 2. Application of Freundlich equation.....	73
4. 1. 3. 3. Application of Temkin equation.....	73
4. 2. Copper desorption isotherms.....	73
4. 2. 1. Copper desorption from the soils.....	73
4. 2. 2. Copper desorption from clay minerals.....	83
4. 2. 3. Humic acid.....	86
