

CONTENTS

	Page
- INTRODUCTION.....	1
- REVIEW OF LITERATURE.....	3
- MATERIALS AND METHODS.....	61
- RESULTS AND DISCUSSION.....	75
This study includes two main parts :	
I - Physiological study.....	75
II- Pathological study.....	75
Part I	75
Physiological studies.....	75
1) Effect of fertilization treatments on the growth flowering and chemical composition of camlin plant.	75
1.1) Growth.....	75
a) Mean plant height.....	77
b) Mean number of branches.....	77
c) Mean fresh weight of stems.....	78
d) Mean dry weight of stems.....	79
e) Mean length of roots.....	79
f) Mean fresh weight of roots.....	80
g) Mean dry weight of roots.....	80
1.2) Flowering :.....	80
a) Mean number of umbels/plant.....	83
b) Mean diameter of umbel.....	84
c) Mean yield weight of seeds/plant.....	84
d) Mean weight of 100 seed.....	84
1.3) Chemical composition.....	85
a) Oil percentage.....	86
b) Oil yield/plant.....	87
c) Cusinaldehyde/plant.....	89
d) Nitrogen content.....	91
e) Phosphorus content.....	92
f) Potassium content.....	93
g) Total carbohydrate concentration.....	93

2) Effect of water regime and different method of irrigation on the growth, flowering and chemical composition of cumin plant.....	
2. a) Effect of different spraying irrigation treatments.....	
2.A.1) Growth.....	94
a) Mean plant height.....	94
b) Mean number of branches.....	96
c) Mean fresh weight of stems.....	96
d) Mean dry weight of stems.....	97
e) Mean length of roots.....	97
f) Mean fresh weight of roots.....	98
g) Mean dry weight of roots.....	98
2.A.2) Flowering.....	
a) Mean number of umbels/plant.....	99
b) Mean diameter of umbel.....	99
c) Mean yield weight of seeds/plant	101
d) Mean weight of 100 seed.....	102
2.A.3) Chemical composition.....	103
a) Oil percentage	103
b) Oil yield/plant.....	106
c) Cuminaldehyde/plant.....	107
d) Macro elements concentration.....	109
e) Total carbohydrate concentration.....	
2.B) Effect of different surface irrigation treatments.....	111
2.B.1) Growth.....	111
a) Mean plant height.....	111
b) Mean number of branches.....	113
c) Mean fresh weight of stems.....	113
d) Mean dry weight of stems.....	114
e) Mean length of roots.....	114
f) Mean fresh weight of roots.....	114
g) Mean dry weight of roots.....	115

	Page
Part II.....	142
Pathological studies and fungicidal treatments.....	142
1) Pathological studies.....	142
1.A) Isolation of pathogen.....	142
B) Pathogenic tests.....	144
2) Fungicidal treatments.....	144
2.A) Effect of some fungicides concentration (Pot exp- eriment).....	144
2.B) Effect of some fungicides (field experiment).....	149
1) Growth.....	151
a) Mean plant height.....	151
b) Mean number of branches.....	151
c) Mean fresh weight of stems.....	153
d) Mean dry weight of stems.....	153
e) Mean length of roots.....	153
f) Mean fresh weight of roots.....	154
g) Mean dry weight of roots.....	154
2.B.2) Flowering.....	154
a) Mean number of umbels/plant.....	154
b) Mean diameter of umbel.....	156
c) Mean yield weight of seeds/plant.....	156
d) Mean weight of 100 seed.....	156
2.B.3) Chemical composition.....	158
a) Oil percentage.....	158
b) Nitrogen concentration.....	158
c) Phosphorus concentration.....	161
d) Potassium concentration.....	161
e) Total carbohydrate concentration.....	161
- SUMMARY.....	163
- REFERENCES.....	174
- ARABIC SUMMARY.....
