	<u>Page</u>
1. Introduction	1
2. Review of Literature	3
2.1 Dry weight of sugar beet leaves as affected by K, Zn and B application	3
2.1.1. Potassium application	3
2.1.2. Zinc application	5
2.1.3. Boron application	5
2.1.4. K, Zn and B. interactions	6
2.2 Sugar beet roots as affected by K, Zn and B application	6
2.2.1 Potassium application	6
2.2.2 B application	9
2.3 Sugar beet yield (top, root and sugar yields) as affected by K, Zn and B application	9
2.3.1. Potassium application	9
2.3.2. Zinc application	14
2.3.3. Boron application	16
2.3.4. K, Zn and B. interactions	21
2.4 Nutrient content and uptake in sugar beet leaves and roots as affected by K, Zn and B application	22
2.4.1. Potassium application	22
2.4.2. Zinc application	23
2.4.3. Boron application	23
2.4.4. K, Zn and B. interactions	26
2.5 Total soluble solids, sucrose and juice purity in sugar beet as affected by K, Zn and B application	28
2.5.1. Potassium application	28
2.5.2. Zinc application	31

2.5.3. Boron application	32
2.5.4. K, Zn and B. interactions	33
3. Material and Methods	34
3.1 Methods of analysis	37
3.1.1 Soil analysis	37
3.1.2 Plant analysis	39
3.1.3 Statistical analysis	40
4. Results and Discussion	41
4.1 Dry weight of sugar beet leaves as affected by K, Zn and B application	41
4.2 Zn and B contents in sugar beet leaves as affected by the applied K, Zn and fertilizers	47
4.3 N, P and K contents in sugar beet leaves as affected by the applied K, Zn and fertilizers	54
4.4 Yield of sugar beet yield (top and roots) as affected by K, Zn and B application	62
4.5 Zn and B contents in sugar beet roots as affected by the applied K, Zn and B fertilizers	70
4.6 N.P and K contents in sugar beet roots as affected by the applied K, Zn and B fertilizers	76
4.7 Diameter and length of sugar beet as affected by the applied K, Zn and B fertilizers	85
4.8 Sugar beet quality as affected by the applied K, Zn and B fertilizers	91
4.9 Sugar yield as affected by the applied K, Zn and B fertilizers	101
5. Summary	106
6. References	110
