

CONTENTS

	Page
1- Introduction	1
2- Review of Literature	2
2.1 Soil organic matter.....	2
2.1.1 Characterization of humic substances.....	3
2.1.1.1 Elementary analysis of humic acids.....	4
2.1.1.2 Infrared spectroscopy of humic substances.....	5
2.1.1.3 Total acidity and acidic groups of humic acids.....	8
2.2 Effect of organic manuring on the availability of macro and micronutrients.....	9
2.2.1 Nitrogen.....	10
2.2.2 Phosphorus.....	10
2.2.3 Iron	11
2.2.4 Manganese	12
2.2.5 Zinc	12
2.2.6 Copper	13
2.3 Effect of organic manuring on yield, plant growth and nutrients uptake	14
2.3.1 Effect on plant growth	14
2.3.2 Effect on nutrients uptake	17
2.3.2.1 Macronutrients	17
2.3.2.2 Micronutrients	20
2.4 Effect of minral fertilization on plant growth and its nutrients utilization	21
2.4.1 Effect of mineral fertilization on plant growth	21
2.4.2 Effect of mineral fertilization on nutrients utilization	24

2.5 Interactions between nutrients in plant and soil and their effect on nutrients uptake by plants.....	25
3- Materials and Methods	28
3.1 Materials.....	28
3.1.1 Soil characterization	28
3.1.2 Humic acid analysis	30
3.1.2.1 Chemical and physical analyses of humic and fulvic acids	32
3.2 Experimental	33
3.2.1 Incubation experiment	33
3.2.2 The green house pot experiment..	36
3.2.2.1 Plant analyses	38
3.3 Statistical analysis	38
4- Results and Discussion	39
4.1 Characterization of the materials under study	39
4.1.1 Characterization of the tested soils.....	39
4.1.2 Characterization of the tested manures	39
4.2 Characterization of humic acids derived from different organic residues	40
4.2.1 Elementary analysis of humic and fulvic acids	40
4.2.1.1 Total organic carbon	41
4.2.1.2 Total nitrogen and C/N ratio	43
4.2.1.3 Hydrogen content and C/H ratio	45
4.2.1.4 Total oxygen ,C/O ratio and O/H ratio	46
4.2.1.5. N/H ratio	48
4.2.2 Infrared analysis of humic acid samples	48
4.2.2.1 Absorption at 3400 cm ⁻¹	49

4.2.2.2 Absorption at 2920-2860 cm ⁻¹	52
4.2.2.3 Absorption at 1725-1700 cm ⁻¹	53
4.2.2.4 Absorption at 1570-1515 cm ⁻¹	54
4.2.2.5 Absorption at 1400-1390 cm ⁻¹	55
4.2.2.6 Absorption at 1300 cm ⁻¹	56
4.2.2.7 Absorption at 1230 cm ⁻¹	57
4.2.2.8 Absorption at 1128 cm ⁻¹	58
4.2.3. Total acidity and acidic groups of humic substances	62
4.2.3.1 Total acidity of humic acids	62
4.2.3.2 Carboxyl groups in humic acids	62
4.2.3.3 Phenolic - OH groups of humic acids	64
4.2.4 Cation exchange capacity of humic acids	64
4.3 Laboratory experiment	68
4.3.1 Effect on soil available P	68
4.3.2 Effect on soil available Fe	79
4.3.3 Effect on soil available Mn	89
4.3.4 Effect on soil available Zn	99
4.3.5 Effect on soil available Cu	108
4.4 Green house experiment	119
4.4.1 Effect of organic manures and mineral fertilizers on dry matter yield of wheat plants	119
4.4.2 Effect of organic manures and mineral fertilizers on macronutrients concentration and uptake by wheat plants	124
4.4.2.1 Effect on nitrogen	124
4.4.2.2 Effect on phosphorus	134
4.4.2.3 Effect on potassium	139
4.4.3 Effect on micronutrients concentration and uptake by wheat plants	144
4.4.3.1 Effect on iron	144

4.4.3.2 Effect on manganese	152
4.4.3.3 Effect on zinc	156
4.4.3.4 Effect on copper	163
5- Summary	170
6- References	173
7- Arabic summary
